

EOSC Future Project Internal Training

Dear EOSC Future WP leaders

WP9 is coordinating training across the project and we have a working group focussing on the needs of the EOSC Future project members.

We would like your input on what training your work package teams would find useful and how they would like it to be delivered (self-paced independent learning, online / face to face workshops). Please let us know of any training needs you have and confirm if the topics below are useful. We would also like to know whether there is any training that your WP needs to deliver to others in the project, for example on services or project processes.

Suggestions we already have include:

- General introductions to EOSC, its aims / benefits etc
- Understanding the activities of various work packages in EOSC Future
- How to create training material and run training courses for EOSC Future, including on tools the knowledge platform will use

Please contribute your training needs in the document below and we will regularly check till the end of the project.

WORKPACKAGE 1
Training required (please indicate priority - high/med/low)
Do you have training to offer other project work packages? Please give details.
Introduction to Key Exploitable Results and Exploitation Management: Introduce the entire consortium to the KERs that have been identified in the project. Also, take this opportunity to discuss exploitation management and how everyone can contribute to it.
What is your preference for method of delivery? Eg self-paced material, workshops.
Introduction to Key Exploitable Results and Exploitation Management: Webinar/Self-paced

WORK PACKAGE 2
Training required (please indicate priority - high/med/low)
Training for representatives of the EOSC Steering Board and members of the EOSC Association to use

the EOSC Observatory to fill in their annual surveys and exploit the collected data for the monitoring of EOSC readiness as well as the monitoring of indicators and contributions to the EOSC Partnership

Do you have training to offer other project work packages? Please give details.

No

What is your preference for method of delivery? Eg self-paced material, workshops.

Short interactive and/or recorded tutorials

WORKPACKAGE 3

Training required (please indicate priority - high/med/low)

Do you have training to offer other project work packages? Please give details.

What is your preference for method of delivery? Eg self-paced material, workshops.

WORKPACKAGE 4

Training required (please indicate priority - high/med/low)

Do you have training to offer other project work packages? Please give details.

What is your preference for method of delivery? Eg self-paced material, workshops.

--

WORKPACKAGE 5
Training required (please indicate priority - high/med/low)
HIGH - How to prepare high quality technical training courses
Do you have training to offer other project work packages? Please give details.
Software Quality Assurance - various aspects (material has yet to be prepared, see above)
What is your preference for method of delivery? Eg self-paced material, workshops.
Workshops

WORKPACKAGE 6
Training required (please indicate priority - high/med/low)
Do you have training to offer other project work packages? Please give details.
What is your preference for method of delivery? Eg self-paced material, workshops.

WORKPACKAGE 7
Training required (please indicate priority - high/med/low)

Do you have training to offer other project work packages? Please give details.
What is your preference for method of delivery? Eg self-paced material, workshops.

WORKPACKAGE 8
Training required (please indicate priority - high/med/low)
Do you have training to offer other project work packages? Please give details.

WORKPACKAGE 9
Training required (please indicate priority - high/med/low)
Do you have training to offer other EOSC project work packages? Please give details.
Yes - in planning phase. Coordination of these training events and possible delivery too.

WORKPACKAGE 10
Training required (please indicate priority - high/med/low)

Do you have training to offer other project work packages? Please give details.
