

STANLEY IDUNG SUNDAY
SENIOR FRONTEND DEVELOPER

[Email](#) | [Github](#) | [LinkedIn](#) | +2349039267685

SUMMARY

Seasoned Senior Frontend Developer with 8+ years of experience delivering scalable, user-centric web applications. Proven track record of improving application performance by 20%, increasing user engagement by 30%, and boosting team productivity by 15%. Expertise in React, Next.js, Vue.js, TypeScript, and GraphQL, with a passion for mentoring teams and implementing CI/CD practices. Adept at solving complex problems and leveraging cutting-edge technologies to exceed client expectations.

EXPERIENCE

KIUB (Dubai, remote)

Senior Software Engineer

2024 – present

Kiub is an AI-powered productivity platform that unifies meetings, notes, tasks, and third-party work tools into a single workspace.

- Led frontend development within a **monorepo architecture**, improving code reuse and maintainability across multiple product surfaces.
- Built rich text note-taking and collaborative editing features using **TipTap**, enhancing user productivity and content workflows.
- Partnered with the **Growth team** to integrate **Meta/Facebook Pixels and Conversion API**, enabling accurate ad attribution and improved conversion tracking.
- Created a reusable component library with React and TypeScript, cutting development time for new features by 50%.
- Contributed to backend development by writing **Convex server logic**, including business rules, data models, and serverless functions.
- Integrated third-party applications, including **Notion, Slack, GitHub, Jira, and Google Calendar**, reducing user context-switching and improving workflow automation.
- Leveraged **Hotjar** analytics to analyze user behavior and inform UX and product improvements.

TALSTRIKE (US, remote)

Senior Frontend Developer

2022 - 2024

- Designed and implemented scalable front-end architecture using Next.js, reducing code complexity by 20%.
- Spearheaded error-handling improvements for third-party APIs, achieving a 98% reliability rating.
- Developed interactive data visualization dashboards using Chart.js and D3.js, enhancing user insights and decision-making.
- Created a reusable component library with React and TypeScript, cutting development time for new features by 50%.
- Review and optimize code quality, mentor junior developers, and foster team growth.

- Integrate CI/CD pipelines for streamlined deployment processes, ensuring rapid feature delivery.

The Elastic group. (UK, remote)

Senior Frontend Developer

2019 - 2021

- Engineered reusable components using React and TypeScript, reducing project timelines by 40%.
- Led the development of responsive, cross-browser applications, boosting user engagement by 30%.
- Integrated automated testing frameworks like Cypress increase code reliability by 20%.
- Streamlined state management using Redux, improving data consistency and reducing bugs by 25%.
- Collaborated with cross-functional teams, ensuring timely delivery of milestones and client satisfaction.
- Improved application performance through code optimization and bundle size reduction techniques.

UNITED BANK FOR AFRICA (Nigeria, remote)

Frontend Web Developer

2017 - 2019

- Built user-centric interfaces using React and JavaScript, enhancing user satisfaction and retention.
- Developed SPA solutions with React-Router, optimizing navigation and workflow efficiency.
- Implemented responsive design principles, ensuring seamless functionality across devices.
- Leveraged RESTful APIs to fetch and display real-time data, improving operational efficiency.
- Applied TDD practices, using tools like Jasmine and Karma to maintain high code quality.
- Conducted performance audits to identify and address bottlenecks, ensuring a smooth user experience.

HUAWEI TECHNOLOGIES (Nigeria, remote)

Junior Frontend Developer

2016 – 2017

- Developed front-end integrations with React.js, ensuring seamless client-side routing.
- Consumed and handled GraphQL and REST APIs, improving data accessibility and reliability.
- Designed intuitive UI/UX interfaces aligned with client specifications, enhancing usability.
- Utilized CSS animations and responsive design to deliver visually engaging applications.
- Conducted thorough testing to ensure cross-browser compatibility and performance.
- Collaborated with backend teams to integrate new features seamlessly into existing systems.

SKILL

Programming languages: JavaScript, Python, and TypeScript.

Frontend Frameworks: React, Next.js, Vue.js, React Native, Redux, Zustand, Mobx, RTK Query, React Query, GraphQL.

Styling & Design: Tailwind CSS, Bootstrap, MaterialUI, SASS, Styled Components, Framer Motion, Three.js.

Testing & Automation: Cypress, React Testing Library, Selenium, Mocha, Chai, Postman, Unit/Integration/E2E Testing.

Tools & Methods: Webpack, Figma, Chrome DevTools, Git, GitFlow, Agile, Scrum, TDD, BDD.

DevOps & CI/CD: Jenkins, GitLab CI, Docker, Kubernetes, Vercel, Netlify.

Professional Skills: Remote Pair-Programming, Team Collaboration, Mentorship, Research, Agile Methodologies, Scrum, Kanban.

Soft Skills: Effective written/verbal communication, attention to detail, and time management.

EDUCATION

Frontend Web Development Program

MICROVERSE WEB DEVELOPMENT

Bachelor Of Science (B.Sc. degree) in Statistics

UNIVERSITY OF ILORIN

2013 - 2016
