

MAPPING PREDICTIONS

Purpose

Making predictions about early human migrations will help you evaluate how *Homo sapiens* were able to settle the Earth.

Process

1. Look at the map below and predict where and how early humans migrated out of Africa. The red X shows where our species evolved in Africa.

2. What paths do you think early humans took as they migrated out of Africa? How do you think they got there? Complete the table below with your predictions.

Location	How early humans got there
