Read the passage given below and answer the questions that follow.

National Park refers to an area strictly reserved and protected by the government to preserve the endangered species of plants and animals generally termed as the flora and fauna. It is the place where activities such as developmental, forestry, poaching, hunting, and grazing on cultivation are not allowed. It also preserves landscapes and historic objects existing in that area. In Uttarakhand, the Jim Corbett National Park is famous for its tigers. Rajasthan boasts of the famous Ranthambore National Park, where the Royal Bengal Tigers roam amidst ancient ruins. In Assam, the Kaziranga National Park is a home to the endangered one-horned rhinoceros. Karnataka showcases the lush forests of Bandipur National Park and the mesmerizing wildlife of Nagarhole National Park. Kerala's Periyar National Park offers a chance to spot majestic elephants and explore the serene Periyar Lake, while Maharashtra boasts of the Tadoba Andhari Tiger Reserve, Sanjay Gandhi National Park and Pench National Park. These are just a few examples of the remarkable national parks in India. Each state has its own unique offerings, allowing visitors to delve into the wonders of nature and witness incredible wildlife very close. With their conservation efforts and breathtaking landscapes, these national parks are a testament to India's rich natural heritage.

Choose the correct answer

1. National parks are areas where

- i. Flora and fauna are protected
- ii. landscapes and historic objects are preserved
- iii. Grazing on cultivation is not allowed
- iv. All the above

2. A National park in Kerala is

- i. Periyar National Park
- ii. Jim Corbett National Park
- iii. Bandipur National Park
- iv. Ranthambore National Park

3. Give one word for that which may soon not exist because there are very few now alive.

- i. remarkable
- ii. breathtaking
- iii. endangered species
- iv. mesmerizing

4. The animal that is mostly found in Kaziranga National Park is the

- i. penguin
- ii. one-horned rhinoceros
- iii. polar bear
- iv. seal

Answer Key

- 1. (All the above)
- 2. (Periyar National Park)
- 3. (endangered species)
- 4. (one-horned rhinoceros)

- a) 14
- b) 21

c) 28

d) 32

Answer Key

1. 2,04,000

2. 2,40,000

3. 36,000

4. 21

EVS

Read the passage and answer the questions that follow

Light like water is life. Extinguishing the light means extinguishing life. The sun is the source of this light. The sun is also a source of heat. Sun is responsible for food production. Sun evaporates sea and river water. Water vapour accumulates in the sky and condenses as clouds. The cloud then falls to earth as rain. Rain softens the soil and makes it suitable for growing food crops like rice, wheat, barley etc. Sun helps keep us healthy by killing harmful germs. Nowadays solar energy is being used more and more. It is even used in cooking our food. When energy is becoming scarcer day by day, the sun can help us a lot.

1) What is the source of light and heat for Earth?

a) The sun

b) The moon

c) The stars

d) The planets

2) How does the sun help with food production?

- a) By providing light for plants to photosynthesise
- b) By evaporating water for irrigation
- c) By killing harmful germs
- d) All of the above

3) How does rain help with growing food crops?

- a) It softens the soil
- b) it provides irrigation
- c) It kills harmful germs
- d) All of the above

4) What is one current use of solar energy?

- a) Cooking food
- b) Generating electricity
- c) Water heater
- d) All of the above

Answer Key

- 1. The sun
- 2. By providing light for plants to photosynthesise
- 3. It softens the soil
- 4. All of the above
