***"Defending with Dignity, Leading with Loyalty."***

## ***Party Manifesto: Building Power through the People***

### [Preamble]

**We**, the Alexandria's Public Servants Party (APS), adamantly support a peoples-first, servants-led, socialist Alexandria. In a dominion ruled by capital and elitism, we are the sword and shield of every commoner. Strive towards enabling the people, increasing public ownership over services, and preventing further collapse of Alexandria's essence to soul-sucking privatization.

### **Core Principles**

- **Economic Democracy:** Turnover sovereignty and dominion of the economy to workers.
- **Anti-Oligarchy:** Decision making power by capital, land monopoly and corporate crime.
- A group of individuals does not begin a game as equals – **Equity Over Equality.**  
**We assist those most overlooked.**

### **Governance**

- **Publicly Provided First:** Government-controlled services take priority - Public Sector Now.
- **Costless Access to Bureaucracy:** No payment by any citizen to interact with their country.
- **Civil Opening:** Chronic disclosure of activities, including reproducing representatives' votes and disallowing undisclosed meetings, must be held.
- **Civil Enlargement:** Creation of new employment positions for citizens within ministries and commissions.

### **Labour and Infrastructure**

- **Build Public, Not Private:** Public works projects will be done by the state and not contracted out.
- **Fair Wages Act:** Contractors and employees of government ministries shall be paid fair wage floors.
- **Labour Councils:** Develop union-like councils that serve a representational function for all employees.
- **Plot Ownership Reviews:** Investigate why some properties have been neglected and possess the unused structures.

### **Civil Liberties & Society**

- **Freedom of Speech:** People have the right to speak negatively about the government as we serve the people.
- **Anti-Discrimination:** Prevent discrimination that targets players based on their social or political ideology.
- **Legal Aid Office:** Create legal aid offices subsidized with taxpayer money focused on legal teaching and advocacy.

### **Justice & Security**

- **Civilian Oversight:** The Welfare and Development Ministries are supposed to provide open access reports.
- **Anti-Corruption Bureau:** Look into corruption such as illegal political bribery or other abuses.
- **Judicial Independence:** Allow the courts and judges to function without control from the parties—the law should be blind.

### Foreign Policy

- **Neutral But Watchful:** Do not involve in formal obligations and commitments but be prepared to protect national boundaries.
- **Solidarity with Socialist Regions:** Provide recognition and collaborations with factions that share similar ideas.
- **Export Excess Services:** Market Alexandria's excess sectors as a template to other nations.

And much more.

### Final Word

We don't serve capital, we don't serve kings—we serve the people of Alexandria. This is your land. Let's build it with socialist courage, bureaucratic precision, and public power.

**Public Servants - For a State that Serves You.**

**Signed:**

Mr Royalties
