

Additional steps for Layer Zero

Angle Money

1. Go to <https://app.angle.money/>. Use a VPN if you get an error message.
2. Buy around 7 agEUR on Arbitrum.
3. L0 TX: Bridge agEUR to any chain you want.
4. L0 TX: Make sure it ends up back at Arbitrum so we can easily swap it later.

Abacadabra Money

1. Go on SushiSwap and swap your agEUR for Magic Internet Money (MIM).
2. Go to <https://app.abracadabra.money/>. Use a VPN if needed.
3. L0 TX: "Beam" the MIM to any chain. Be aware that you get charged \$1 for each time you bridge.
4. L0 TX: Make sure it ends up at Arbitrum so we can swap it easily to something else.

Radiant

1. Go on SushiSwap and swap MIM for RDNT. (Arbitrum)
2. Go to <https://app.radiant.capital/>.
3. L0 TX: Deposit \$5 of ETH on any chain.
4. L0 TX: Borrow \$2 of a stablecoin on another chain. (USDC/DAI)
5. L0 TX: Bridge RDNT to Binance Smart Chain. If you generally don't use this chain, just send 2 RDNT (\$0.50) so it doesn't matter if you don't recover it. If you use it and have enough for gas, you can bridge it back.
6. L0 TX: Repay the loan, withdraw your ETH.
7. Swap RDNT back for ETH.
