Lyrics:

[Verse 1]

The CPU's the thinker
The brain in the storm
Clocking cycles
Solving puzzles
Keeping us warm
The GPU paints worlds
A pixel parade
Rendering dreams in every frame it's made

[Chorus]

It's the heart of the machine
Working in sync
Circuits alive
Faster than you think
From bits to bytes
The system hums
The future's here
Where it all comes from

[Verse 2]

RAM's the sprinter
Quick on its feet
Holding the data
No time for a seat
The SSD's a rocket
Fast as a flash
No spinning plates
Just digital dash

[Prechorus]

NIC's the messenger
Wires or air
Connecting the world
It's everywhere

[Chorus]

It's the heart of the machine
Working in sync
Circuits alive
Faster than you think
From bits to bytes
The system hums
The future's here
Where it all comes from

[Bridge]

Motherboard's the highway
Lanes for the flow
PSU's the power
The charge we bestow
Cooling's the breath
The whispering breeze
Keeping it cool
No overheating
Please
UEFI's the gate
Unlocking the door
The OS
The captain
Commands to explore
