

Warband League Instructions:

Warband League is a multiplayer ongoing series where you build a small army and add units as you fight battles against other warbands. This will culminate in a tournament!

Be sure to join the warband league channel in the [Warhammer Tournament Discord](#) to participate.

Stage 1 - Raise an Army! How to build your warband:

Spending initial funds:

1. You will receive 5,000 gold to build your original army
2. Legendary Lords & Heroes, Campaign Units, Regiments of Renown & Chevrons & Extended Roster Units & Thunderbarges will not be allowed at any stage in Warband league.
3. You may take malevolent tree units in your army or similar generic options not usually in multiplayer.
4. **Choosing your starting army**
 - a. **You must choose 1 lord without any abilities, spells, mounts, or items selected**
 - b. **You may not choose any heroes or single entity units other than your lord in your initial army.**
 - c. **You may not choose any flying units with ranged attacks in your initial army.**
 - d. **You must have at least 2 melee infantry units in your initial army.**
 - e. **No unit in your initial army can cost more than 900 gold, and you may not have more than 2 units that cost over 700 gold(EG. you can take 2 Winged Lancers and up to 6 Kossars). This cost restriction does not include your lord.**
 - f. **Your total army must cost anywhere from 4,500 to 5,000 gold.**
 - g. **You MAY NOT take more than 6 of the same unit card before round 1**
 - h. **You may have up to 20 unit cards in your starting warband before round 1**

Gaining funds & spending them:

1. After every game, you will be awarded 2,000 gold that you can choose to save or to spend to add forces to your army.
2. You may not add more than 4 different units after each game
3. You may take up to 1 hero in addition to your lord in total until you have 10,000 total funds (You can add as many heroes as you like after that point)
4. You may not take duplicates of the same spell at any point in Warband League (bound spells with limited uses do not count towards this limit).
5. You may not take duplicates of any ability or item that summons units
6. You may buy up to 1 mount during every round for your entire warband. If a character already has a mount and you wish to buy a new one, you will not recover any funds.
7. Any character with multiple mounts can choose to take any purchased mount they wish to battle.
8. You may only purchase 1 ability item or spell each round.
9. When you buy a hero he comes without any mounts, spells, items, or abilities.
10. ALL LORDS AND HEROES SHOULD BE GIVEN NAMES and ideally backstories

11. You are not required to attack, but cannot use the white lines that are the edges of the map defensively. The reward for winning and losing is the same, so I recommend attacking because it will be more fun and I won't call the lord a coward
12. You may have up to 40 unit cards active in your warbands after stage 1 begins. If you have more than 40 units at any point, you can substitute between purchased units as you like before battles.

Signup & Sportsmanship:

Any participant who displays unsportsmanlike conduct or engages on personal attacks will not be welcome to continue in the event.

Find opponents and important documents in the warband league channel of [this discord](#).

Add your warband to [this sheet](#) to join the league.

Once your warband has been added, [signup for the bracket here](#)
