Small Appliance Repair Shop Near Me in West Hollywood, CA

After 10 years serving West Hollywood, we've learned that most people assume any handyman can handle appliance fixes. Here's the deal: not all repairs are equal, and a specialist makes a world of difference. At Everyday Appliance Repair, we offer transparent, reliable service — with pricing you'll know upfront, before we touch a single wire.

In our experience here at Everyday Appliance Repair, knowing West Hollywood's specific needs — the older wiring in Plummer Park apartments, the high-end Sub-Zero and Viking units in Sunset Strip condos — has been what separates us from the generalists. With over 3,000 successful repairs under our belt, we've earned our reputation the old-fashioned way: showing up on time, being honest about costs, and fixing things right the first time. You'll find us at 7533 Lexington Ave #203, right in the heart of the neighborhood.

Honestly, what surprises people most is how much they can save with regular maintenance instead of waiting for a breakdown. Take dishwashers — they're not plug-and-play when something goes wrong. We've seen West Hollywood residents spend \$400 on emergency repairs when an \$89 inspection would've caught the problem six months earlier. Our pricing policy is simple: you know exactly what you're paying before we start.

Got an issue? Swing by or call us for a free estimate. We'll tell you straight whether it's worth repairing based on your specific appliance model and age. Find us on Google Maps or reach us through our website.

What Most People Get Wrong About Small Appliance Repair Shops Near Me

Most people think the closest shop on Google Maps is the safest bet. After 10 years in this trade, I'd push back on that hard.

Here's a real example: a client came to us after a shop on Santa Monica Boulevard attempted a compressor repair on her Sub-Zero 648PRO. The technician didn't stock the correct OEM part, ordered a third-party replacement, and the unit failed again within 60 days. She ended up spending \$780 total — nearly double what the job should have cost — because the first shop didn't have the brand-specific experience or parts inventory to do it right.

Shops that don't regularly service premium brands like Sub-Zero, Thermador, or Viking are often waiting 5–10 business days for special-order parts. At Everyday Appliance Repair, we stock components for the brands most common in West Hollywood homes, which means faster turnarounds and fewer callbacks.

Here's how part availability and repair timelines actually break down by brand:

Brand	Part Availability	Typical Repair Time	Cost Range	Our Recommendation
Whirlpool	High	1–2 days	\$150–\$300	Strong repair candidate
Bosch	High	1–2 days	\$200–\$350	Strong repair candidate
LG	Moderate–High	2–3 days	\$175–\$325	Worth repairing if under 8 years old
Sub-Zero	Moderate	3–5 days	\$300–\$550	Repair — built to last 20+ years
Thermador	Low–Moderate	4–7 days	\$350–\$600	Verify parts availability first
Viking	Moderate	3–5 days	\$300–\$500	Repair with certified tech only

Our recommendation: Choose a shop that stocks parts for your specific brand and can show you proof of manufacturer-certified training. Ask directly — "Have you repaired this model before, and do you have the parts on hand?" A shop worth trusting will answer without hesitating.

Pro Tip from Everyday Appliance Repair:

Shops that regularly work Fairfax District and Plummer Park know that older buildings in those areas often run on 15-amp circuits that can't support certain repair techniques or testing equipment. A tech unfamiliar with West Hollywood's building stock can cause more problems than they solve.

How Much Does Small Appliance Repair Cost in West Hollywood?

After a decade of repairs across West Hollywood, I can give you real numbers instead of the runaround. Most residents should budget \$150–\$450 depending on appliance type, brand, and the complexity of the fault. Here's a breakdown based on what we actually charge:

Service Type	Cost Range	Typical Timeline	Notes
--- --- --- ---			
Inspection / Diagnostic	\$89–\$120	Same-day	Applied toward repair cost if you proceed
Washer or Dryer Repair	\$175–\$350	1–3 days	Most common: not draining, not heating
Refrigerator / Freezer Repair	\$300–\$450	2–5 days	Sub-Zero and Thermador can push toward \$600
Dishwasher Repair	\$150–\$300	1–2 days	Door latch, pump, and heating element are top failures
Oven / Range Repair	\$175–\$375	1–3 days	Igniter replacements are most common

One local factor worth knowing: in Melrose Hill and the blocks near The Grove, service demand is consistently high, and last-minute weekend calls may carry a \$25–\$40 after-hours surcharge — ours included. We're upfront about that. Anyone who isn't is worth questioning.

Always ask for itemized pricing before authorizing any work. If a shop won't break down labor versus parts costs, walk away.

What Should I Look For When Choosing a Quality Appliance Repair Shop?

Proximity matters, but it's the third thing to consider — not the first. Here's what we've learned after handling thousands of repairs in West Hollywood:

Certifications come first. Ask whether their technicians hold manufacturer certifications. Bosch, for example, runs a formal certification program for authorized repair technicians. LG and Samsung do too. At Everyday Appliance Repair, we maintain current certifications for Bosch, Whirlpool, and LG, which also gives us direct access to OEM parts rather than aftermarket substitutes.

Brand familiarity matters more than general experience. A tech who's replaced 50 KitchenAid KDTE334GPS dishwasher control boards will fix yours faster and cheaper than one who's "worked on dishwashers for years." Ask specifically: "How many of this model have you repaired?" We keep internal records — in 2023 alone, we completed 47 Sub-Zero refrigerator repairs across West Hollywood and Beverly Hills.

Transparency is non-negotiable. Any shop that won't give you a written estimate before starting work, or hedges on whether their parts are OEM versus aftermarket, is flying blind on your dime.

West Hollywood's building mix — Sunset Strip high-rises, Hancock Park Craftsman homes, mid-century Melrose bungalows — means appliance configurations vary block to block. We've worked all of them. A shop that only knows cookie-cutter installs will struggle when they open a cabinet and find a 1968 electrical panel.

Finding a [Small Appliance Repair Shop Near Me in West Hollywood](#)

We're at 7533 Lexington Ave #203 — about four blocks north of Santa Monica Boulevard and less than a mile from the Sunset Strip. Fairfax District is a 7-minute drive east. Plummer Park is practically in our backyard.

According to Everyday Appliance Repair, same-day service is available across most of West Hollywood proper, with next-day slots covering Hollywood, Beverly Hills, and Mid-Wilshire. Studio City and Sherman Oaks typically fall within a 20–25 minute drive via Laurel Canyon or La Cienega — we cover those areas Tuesday through Saturday.

One thing that helps us move fast in this neighborhood: we know the parking quirks, the building access codes common in Sunset Strip condo towers, and which blocks near Melrose have freight elevator restrictions that affect appliance access. That's not something a shop from Burbank driving in blind is going to know on their first call.

Find us on Google Maps or book directly through our website.

What Makes Appliance Repair Unique in West Hollywood?

We've done enough repairs here to know that West Hollywood throws specific curveballs that other LA neighborhoods don't.

The climate is the first one. Most people think of West Hollywood as mild year-round — and mostly, they're right. But Santa Ana wind events in September and October push indoor temperatures past 95°F in poorly ventilated units, and we see a predictable spike in refrigerator compressor failures every fall as a result. Brands like Samsung and LG with exposed condenser coils are particularly vulnerable when ambient temps stay above 90°F for more than 48 hours. We've replaced more compressors in October than any other month.

California's Title 20 energy efficiency regulations also affect which replacement parts are compliant — and this is one area where inexperienced techs make expensive mistakes. Electric

dryers and older refrigerators sometimes require updated components to remain code-compliant, particularly in any unit that's been renovated after 2019. West Hollywood's own building department has stricter enforcement than many surrounding cities, and we've seen clients get flagged during inspections because a previous repair used a non-compliant heating element.

The housing stock itself is a factor too. Fairfax District has a large concentration of 1940s–1960s construction where kitchen electrical panels weren't designed for modern appliance loads. Plummer Park-area apartment buildings frequently share circuits in ways that affect how we test and diagnose faults. Sunset Strip condos, built more recently, often have proprietary ventilation setups that require brand-specific service manuals — not generic repair guides pulled off YouTube.

At Everyday Appliance Repair, we've built our parts inventory and training around exactly this mix. That's why our callback rate — repeat visits for the same fault — runs under 4%.

FAQ

What appliance brands does Everyday Appliance Repair service in West Hollywood?

We're trained and certified on Whirlpool, Maytag, Bosch, LG, KitchenAid, GE, Sub-Zero, Viking, and Thermador — the full range from everyday Kenmore units to the high-end appliances common in Sunset Strip and Hancock Park homes. In our experience, most West Hollywood households have at least one premium brand that requires manufacturer-specific parts, and we stock accordingly.

How much does appliance repair cost in West Hollywood?

Budget \$150–\$450 for most repairs. Sub-Zero and Thermador work typically runs \$350–\$600 due to specialized OEM parts. Our \$89–\$120 diagnostic fee gets credited toward the repair cost if you move forward. No surprise charges — you'll see a written estimate before we start.

Do you offer same-day appliance repair in West Hollywood?

Yes. Same-day slots are available Monday through Saturday for most of West Hollywood. Call before noon at (323) 364-0193 for the best chance at a same-day appointment — afternoon slots fill by 11am on weekends. We serve everywhere from Melrose Avenue north to the Sunset Strip without any travel surcharge.

Is it worth repairing an old appliance or replacing it?

At Everyday Appliance Repair, our rule is straightforward: if the repair costs less than 50% of a comparable new unit and the appliance is under 10 years old, repair it. For premium brands like Sub-Zero or Viking — which are engineered to run 20+ years — we'd stretch that threshold to

12 years. A \$400 compressor repair on a \$3,500 Sub-Zero refrigerator is almost always the right call.

Ready to Book a Repair?

Call us at (323) 364-0193 for a same-day quote. Weekend slots go fast — most Saturday mornings are fully booked by Thursday afternoon, so don't wait on a problem that's getting worse.

At Everyday Appliance Repair, we've handled everything from a Kenmore washer refusing to spin in a Plummer Park studio to a Viking range igniter failure in a Sunset Strip penthouse. Same honest pricing either way. Visit our website to schedule or check availability, and find us on Google Maps for directions and current reviews.
