A doc by Secretgaygent69

Steam still lets pretty much anything on it. In particular the horror and erotica games are full of garbage. So the majority of this doc is those. With a wild card category for odd games at the end.

The parents find Tisavil and her child, concluding that the vaxomon would do something wrong, but it ran into the forest, since the parents kept the child in the house until he turned 10 years old. This is the closest a game has come to Yume Nikki, I love it.

If the creator sees this, how many endings are there? I got one ending, but I didn't get the third partner (I think). I'm wondering if there is another ending if I find them all!

[IBLIS2:sorcery](#)

Demon sorcery2 is a first-person psychological horror game. The events, the voiceovers are scary and completely real. Explore a mysterious village with ever-changing passwords in an atmospheric world and enjoy the terrifying joy of horror. Don't forget.. the demon is a production based on realism.

ABOUT THIS GAME

WARNING: This game may trigger seizures from people with photosensitive epilepsy. It is left to the discretion of the player.

IMPORTANT NOTE: The game focuses on exploration and slowly builds up tension to create a deeper and more meaningful experience. The story of the game can be very disturbing as it is supported by light, loud and sudden sounds. Take into account that it makes you feel the feeling of fear too much and that it is a psychologically difficult game.

Demon sorcery 2 is a first-person psychological horror game.

Environment

The game is played in a village environment. It is a gloomy environment, you are alone in the village, but the interesting thing is, where and why do these voices come from outside of you? You will feel your mind disappear in an interesting way.

The plot of the game

In this game, which is a sequel to the first game inspired by real events in 1993, Iblis, the demon we thought we had sent to hell actually haunted our village. Let's see if you can destroy the demon cult that has taken the village captive.

Supernatural beings

The jinn, the living dead, who do not always know where and when they will appear...

Developer's comment about the game

The demon cannot harm you physically, but it can inflict deep wounds on your thinking and psychology. We recommend that people who are afraid of the dark, have a heart condition, and are afraid of being alone should not play alone.

IMPORTANT NOTE:

This event, which actually happened in 1993, was made into a game based on what the main character tells. We have not been able to find support for the voice-over of this game because of the thought that there is a curse in the game, since there was a case of a cleric who died while he was trying to help in the development of the subject of this game and would support its vocalization, and then there was another case of a cleric who experienced the same event, and we have done it with our own means.

[Don't Steal My Christmas!](#)

ABOUT THIS GAME

Don't Steal My Christmas! is a game that shows that all creatures want to celebrate Christmas in warmth and comfort. Fight against your friend for the side of people or Christmas monsters.

You have a choice: play as the Snowman or as the Boy.

The snowman has taken over the house where people live and is preparing to celebrate Christmas with his monster friends. He needs to complete a number of pre-holiday tasks, such as: Cook Christmas dinner, Set the table, and others, and then celebrate Christmas in the house. He will be hindered by the Boy, who by violent means tries to stop him. Electric shockers and first-aid kits are scattered around the house to protect against the Boy, and you also have the opportunity to give a slap on the back of the head and throw it away very far.

In the game for a Boy, you are given the opportunity to use many objects in order to prevent the Snowman from finishing his business, such as: Lamps, Dishes, Christmas gifts and others.

More powerful means of attack are in locked boxes, which can be opened by collecting keys scattered around the location. Protect the house from the monster to win this game!

ABOUT THIS GAME

FEAR - a horror game made in realistic 3D graphics, immersing in an atmosphere of horror and fear.

Brief background:

The main character, Deacon, an office worker, is struggling with some illness, because of it he can control his dreams.

You have to overcome your fear, going through gloomy locations for the main character, along the way solving various puzzles and trying to understand what is happening in general, in what the lines with which Deacon accompanies various situations will help you. Believe me, the atmosphere in the game can cause fear from everything from a brick falling from a wall to a suddenly opening door.

The game is still at an early stage of development, but in the future there will be many more locations and mysteries to be solved.

I deleted all my previous review because it seems the developer didn't even contact the original Granny developers, they don't have the right to make this game and make money from it lol. Someone in discussions pointed it out in a thread opened by a mod, the developer came in and tried to argue making excuses, giving Granny Simulator as an excuse somehow... then they closed the thread after saying "toxic granny community" hahaha :D Just to make it clear, it was the dev saying that, they talk like they don't even know what copyright means

Also, the top review that is positive was in that thread saying toxic things and attacking the person asking questions about copyright. Shady and it seems like they are friends with the developer. Don't support this imo. I bought it by mistake thinking it's official, I should've checked

Edit: They removed my thread in the discussions mentioning these things and also removed that other thread they locked, after my review. This is an obvious cashgrab. Fan projects like unofficial remakes are usually free on the internet and they only get money from donations, they get permissions from developers too unlike in this case here. They brand this as a different

game with a different vision which is ultra funny, they just don't wanna get hit with copyright strike. They could've made their own game and name it anything other than "Granny Remake" otherwise. The changes they made aren't even good anyway. I already reported the product here on the store page, I suggest we all do the same. Not sure if I'll be able to get my refund but I don't care about the money, I just don't want these people to make money like this. They have the talent to make some original indie game without resorting to such tricks...

If you haven't figured it out yet, the game is too different and will change even more. + I, and no one who was interested in this, did not find a trade mark for the word "Granny".

And, where is it written that I should not use the name "Granny remake"?

MATURE CONTENT DESCRIPTION

The developers describe the content like this:

The game contains scenes of a sexual nature.

ABOUT THIS GAME

Welcome to your new summer job at the Sexy Fucking Club, where men come to have a good time! The main attraction, of course, is the new generation of sex dolls. These are animatronic robots programmed to do whatever you want! However, at night, the behavior of the robots became somewhat unpredictable, and finding you as a security guard turned out to be much cheaper than finding a repairman.

From your office, you should keep a close eye on the security cameras. You have a very limited amount of electricity that you can use overnight. This means that when you run out of energy, no more security doors and cameras! As soon as one of the dolls left his post, your task will be to find them and, as a last resort, close the doors.

Features:

- *Tense gameplay. At your disposal are only cameras and doors. All this requires energy, which must be saved;
 - *Three dolls, each with their own AI. Someone needs to be watched more often, and someone often moves;
 - *After passing 5 nights, the custom night will become available to you. In it you can customize the game as you want;
 - *A large number of jumpscare;
-

This game will not give you:

[Dragon Must Die](#)

ABOUT THIS GAME

This is a magical capital of another world, but a girl wearing a nun's clothes was taken away by a dragon. The girl seemed to know her fate and told the hero never to save herself. But the hero still came to the dragon's nest. He killed many dragons with his weapon, but on the way, he found that the dragons were not the real enemies. And if you want to truly protect the world, you must kill the girls... In order to protect the girls, the hero has finally come to an end...?

Players must guard the girls to defeat the dragon, unlock ten girls to trigger the "real ending", and lead the girls to the right reunion.

The player's spatial imagination is required, and the shooting trajectory of the gun is controlled by the mouse. After the bullet is shot, it will be refracted when it encounters obstacles until it hits the dragon guard. However, the bullet's energy will disappear after flying for a period of time, so it has to be refracted within a certain period of time. The dragon guards of each level are defeated, and the bullets are limited. After all the dragon guards are not defeated, the level fails.

If you can get bonus stars after clearing the level, players need to use the stars to unlock the CG.

HUH?

[Interstellar Turtle Legend](#)

ABOUT THIS GAME

The universe is at war, and you're just a bastard. What choice will you make: Survive through the cracks and survive, or be invincible and kill the Quartet? Can you still hold on to your heart?

This is a sea-watching type game that simulates an absurd and realistic universe in which everything is controlled by AI, and the player is just an observer. In the game, the player can move the field of view, zoom and rotate the screen, adjust the speed of the passage of time, and view the detailed information of the object, but cannot make changes to the progress of the game.

There are six factions in the universe: the Galactic Commune, the Guardian Council, the Xinghai Group, the Second Empire, the General Alliance, and the Hyperspace Zombies. They are at war. Each faction uses energy to build buildings: docks, turrets, reactors, and command centers. Docks can spawn ships, turrets can fire cannonballs, reactors can create energy, and command centers can expand territory.

There is a character system in the game. Each building and ship has a corresponding position: a shipbuilder in the dock, a gunner in a turret, a generator in a reactor, and a general in the command center. As buildings or ships are created and destroyed, people are promoted, demoted, and even killed. At the end of the game, the experiences of the 5 most prolific characters will be compiled into a celebrity resume.

At the start of the game, a Travelling Bastard with a neutral faction will spawn, and it will not attempt to attack anything. Wang Ba travels through the universe, witnessing the rise and fall of forces, and making friends with people of different professions. At the end of the game, what the bastard saw and heard during his travels will be compiled into a bastard's diary.

Note: The "Celebrity Resume" and "Bad Diary" mentioned above will only be generated in the game folder in txt format, and players need to open and view them manually.

In the game, music will be played when a certain faction wins: People's Army Loyal to the Party is played when the Galaxy Commune is victorious, a toast song is played when the Guardian Council is victorious, Marching Through Georgia is played when the Xinghai Group is victorious, and Li Zhongtang is played when the Second Empire is victorious, Battle Hymn of Republic is played when the general alliance wins, and It's a Burning Memory is played when the Hyperzombies win.

This is a remake of my previous game "Space Combat Simulator" (published on itch.io). My plan for future updates is to increase the types of ships and turrets, and add new weapons and damage effects.

This game is made by me with c++ and windows api, and does not use an off-the-shelf game engine. All fonts, textures and music are made by myself.

[Power Champions](#)

ABOUT THIS GAME

In the beginning of time... there were only darkness and purple lights.

But then a vortex appeared... and absorbed all the purple lights.

This action created an entity, who called herself Ellora, The Goddess.

Afterward, she created Zarion (with abundant nature and sacred places - known as Paradise)

and bestowed her essence to create other planets, especially Zelothe (which possesses a type of power called technology).

Evil emerges from Zeloath, corrupting everything and reaching Zarion, bringing destruction and madness... KillDeath conquered all the planets, but not all hope is lost because there are...

THE POWER CHAMPIONS... protectors of Zarion and the most powerful heroes the universe has ever known.

Introducing the newest Hack and Slash game, Power Champions...a game focused on thrilling and frenetic gameplay, where the player must destroy a horde of automatons. You will embody one of the elemental gods, children of Ellora, and will have to follow the steps to save the planet Zarion, collecting various cards (which empower the player) and assembling your build, increasing your damage, defense, and speed points. Each of these points, specifically, will produce a different effect that can assist in your playstyle because, rest assured, there is not only one way to win in Power Champions.

With each new stage comes a new challenge...the player will acquire various Power Points, which must be used to upgrade your weapons and your build. These points are essential for your character's progression in the game and to effectively destroy opponents based on your own choices...but don't be deceived...the game has various traps that will test you at all times...are you ready?
