

EVERGLADES WEBQUEST

1. You have been assigned to research the everglades..
2. You will answer all 10 questions on google slides by the end of this webquest.
3. You will use your online resources provided in the webquest to answer each question.

Let's begin.....

1. What exactly is an [ecosystem](#)?
2. Now that you know what an ecosystem is, find out some information about the Everglades.
Where exactly is the [Everglades](#) located?
3. Once you have discovered the exact location of the Everglades, explore its [climate](#).
Describe the climate in 1-2 sentences.
4. Examine some of the [threats](#) of this ecosystem. Tell me in 3-5 sentences what these threats (ex: pollution, deforestation, over population, etc.) are and how they affect the Everglades.
5. Identify 5 [animals](#) in the Everglades.
6. Identify 5 [plants](#) in the Everglades.
7. Create a [food web or food chain](#).
8. What would happen if one of the animals or plants was removed from the [ecosystem](#)? Explain in 3-5 sentences.
9. So, you should know all about the food chains, animals, plants, and threats to this ecosystem. Explore the [terrain](#) of this ecosystem. Is it a desert? Grasslands? Ocean?
10. Finally, I want you to research what type of [people](#) live here now or lived here in the past.
 - What nationality are these people?
 - Do they help or harm the ecosystem?
 - Write 5 sentences describing these people.
