

Below are items that I will take as donations. If anything is marked in **red** that means I have enough at the moment and do not need any more. **Green** is high priority. I will try to update this document at least once a semester.

Many of these items can be donated from excess or after you have used them instead of simply going into trash/recycling. They will be used up in the activities (we are cutting, gluing, building, testing, redesigning, etc.), so quality and longevity are not issues, however, please make sure what you donate is clean and safe for students to handle.

–Teacher Bardessono
