Proud Student Moments during Remote Learning

Mary Marotta

*** Created for District During Remote Learning Academy Showcase - 2020-21 School Year ***

TIMING

2 hr - 3 hrs

OVERVIEW

There has been a shift in education to online and remote learning due to COVID-19. There are many opportunities in Remote Learning for students and teachers to share! We encourage our students and teachers to be curious, take risks, and share their learning with one another. We will share your opportunities by shining a light on your work and to celebrate discoveries by publishing to our district website and sharing with our community. Additionally students will also be encouraged to reflect on mistakes and how they learned from making mistakes.

WHAT STUDENTS/TEACHERS WILL LEARN AND CREATE

- Students will reflect on a proud moment when learning online.
- Students will create an Adobe Spark Page and/or video to document their story.
- Students can share their work to their school portfolio
- Students will share their work with peers and members of the school community.

MATERIALS AND RESOURCES

- Adobe Spark
- Student Sample (coming soon)
- Steps to Create a Page / Portfolio for Story

INSTRUCTIONS

LEARN AND EXPLORE

STEP 1

- Students will join the Adobe Spark Classroom
- Adobe Spark - Professional Learning Kit
- What is Adobe Spark?
- Teach Spark on Chromebooks Video

STEP 2

- Students will reflect on their new remote learning environment and brainstorm on successes during this time as their proud moment.

- Students will create an Adobe Spark Page to share their story. This portfolio page can be a combination of photos, videos, or write-ups

STEP 3

- Students will write about their learning, and gather images that represent the event.

CREATE

STEP 1

- Storyboard the event that you are sharing. Collect the images and design a post or add directly to the Spark Page.
- Option to create the story and narrate in Adobe Spark Video and add to your page.

STEP 2

- Include Profile Picture and Name
- Take a look online portfolio examples for some inspiration

STEP 3

- Your work progress will be viewed in Adobe Spark Classroom
- Your Published page will be added to your Portfolio and the link will be collected and shared through a form.

FEEDBACK

Formative feedback will be provided through Adobe Spark Classroom while working on the project.

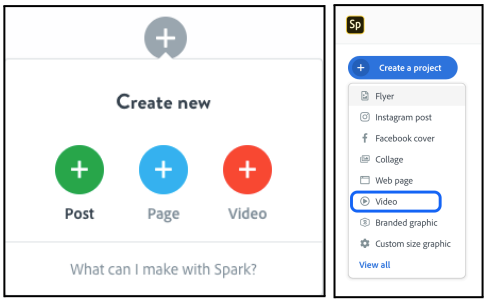
Communication: language	Your language choices are imaginative, memorable, clear, compelling, virtually error-free, and enhance the effectiveness of your work or presentation.
Creativity: innovative thinking	You extend a unique idea, and create new knowledge or knowledge
Critical thinking: evidence	Your information is taken from source(s) if needed. You will use creativity to design and articulate your reflection.
Visual design	You use contrast, balance, alignment, proximity, color to communicate your message and direct your audience's attention

SHARE

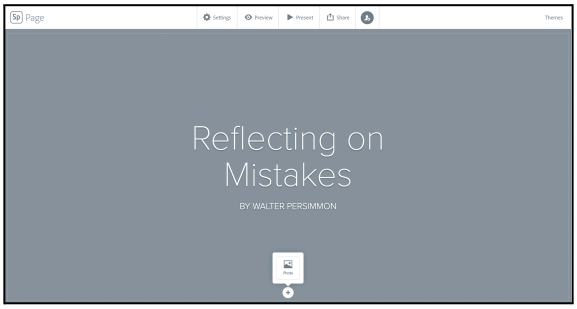
Student work will be published to Spark Classroom and collected using a form. Selected examples of students' work will be published to the district website with parent permission..

OPTIONAL TUTORIAL FOR YOUR ADOBE CREATIVE TOOL

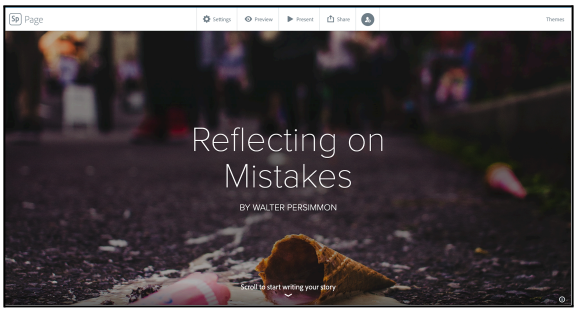
1 This is the first tutorial step where you can explain to students how to get started. You may want to add a screenshot to the right with your actual project. You can see an example from a Spark tutorial.



2 This is the next step students can do. You may want to add a screenshot to the right with your actual project. You can see an example from a Spark tutorial.

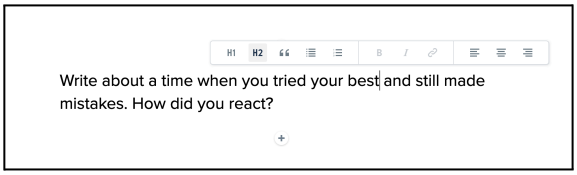


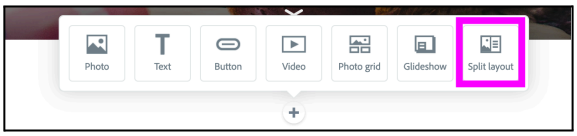
3 This is the next step students can do. You may want to add a screenshot to the right with your actual project. You can see an example from a Spark tutorial.



4 This is the next step students can do. You may want to add a screenshot to the right with your actual project. You can see an example from a Spark tutorial.

To add more steps, right click and select "insert row below."





6 When you like the content as well as the look of your Page, select Share. Choose whether you want to share your author information or be able to be featured on the Adobe Spark website.
