Black Rose Wars & Rebirth “All-In” 3 Boxes Insert/Organizer - No Sleeves

[\[Go to Sleeved Version\]](#)

[\[Go to Schools of Magic Dividers\]](#)

This design is meant to fit *everything* released by LMS for Black Rose Wars/Rebirth before the “Black Rose Wars Revised Edition” into only 3 boxes: **Crono** (or **Inferno**), **BRWR**, & **Rotas** (using another short lid of your choice; Apocalypse pictured below). That means the less Black Rose Wars stuff you have, the less useful my design will be for you:

- ★ **Black Rose Wars** Kickstarter (OR retail with Summonings and Brute Force models), **Hidden Thorns**, **Sator Box**, **Crono**, **Inferno**, **Ordalia** (or Ordeal promo), and Familiars: **Cerebus**, **Draco**, **Griffin**, **Hydra** (except components duplicated in Rebirth and tokens replaced by models)
- ★ Dungeonology crossover: **Rocca Civetta**
- ★ Nova Aetas Renaissance crossover: **Magister**, **Draco**, **Hyperion**, **Medicio**, and **Minotaur**
- ★ **Duel: Lex** and its promos (except components duplicated in Rebirth)
- ★ **Duel: Void** and its promos (except components duplicated in Rebirth)
- ★ **Rebirth**, **Deadly Mask**, **Rotas Box**, **Apocalypse**, **Dread Forge**, **Gaea Reborn**, **Seal of Fire**, **Jukas**, and **Irene**
- ★ Ashes Magazine promos (**Cthuly**, **Helblindi**, **Cosma**, **Fabio**, **Razvan**, and **10th Anniversary**)
- ★ All single-card promos
- ★ PNP: **Christmas School of Magic & Spurchia** (I would highly recommend the [upgrades/mods posted by mrslurpy](#))
- ★ Includes room for other 3DP upgrades (e.g., BRW [snap bases](#)) and PNP extensions (e.g., the [Avatar-to-Mage conversions by mrslurpy](#))
- ★ There is also room for everything upcoming from **Requiem: Downfall of Magic**, except perhaps the giant Selene model
- ★ There is still some wiggle room, but **I do not guarantee that this will fit the new content from the [Revised BRW campaign](#)**

★ **BRWorg2B-Nina-top**

This stores 6 small, (sets of) relatively flat things in the space not needed for Nina the Manticore; I'm using it to store the 3DP Shield and Trap by Barbapere with my Snap-On Half-Bases; another good option would be the 48 tokens from BRW that are not used in Rebirth (7 element and 1 inhibition per player)

★ **BRWorg2B-OPTMiscCenter-1Slot**

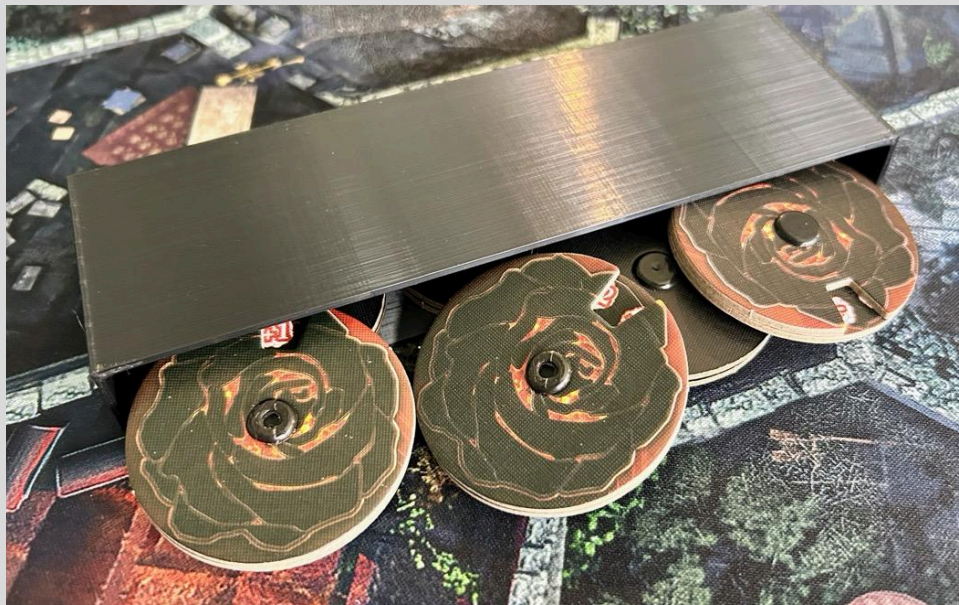

If you do not have Mina the Manticore (Dungeonology Rocca Civetta), this can be used for storage of regularly used components you do not want to store elsewhere

★ **BRWorg2B-OPTMiscCenter-6Slots**

If you do not have Mina the Manticore (Dungeonology Rocca Civetta), this can be used for storage of regularly used components you do not want to store elsewhere, divided into 6 sections

★ **BRWorg2B-OPTMiscSide-3SlotsX2 - Print 2**

If you have something like tetsuo001's 3DP Snap Bases for the BRW mages and evocations, these hold them nicely (as on the left and right of the Room Hexes, above), and/or the little rose pins; I also use this space to hold the 48 tokens from BRW that are not used in Rebirth (7 element and 1 inhibition per player)

- 1 Necrodragon Model

★ **BRWorg3B-Selene TEMP**

I have a (likely foolhardy) hope that the Selene Model from the Requiem: Downfall of Magic expansion will fit in this last space. If nothing else, this file is a spacer that helps keep the other Bottom Layer pieces from moving around.

Middle Layer

*I have prioritized putting Models required by the base games' Rooms and/or any of the Schools of Magic in the Top Layer and Avatars/Forgotten Evocation Models in the Middle Layer. However, most of these files are flexible with what can be stored where and the 8 total insert pieces do not have to be "Middle" or "Top". But if you are not going to store them exactly as below, definitely pay attention to the file name (e.g., BRW vs. BRWR) and any Evocation Names written into the insert pieces (**bolded**).*

Black Rose Wars & Rebirth “All-In” 3 Boxes Insert/Organizer - Sleeved

This design accommodates sleeves up to 60µm thick

[\[Go to No Sleeves Version\]](#)

[\[Go to Schools of Magic Dividers\]](#)

This design is meant to fit *everything* released by LMS for Black Rose Wars/Rebirth before the “Black Rose Wars Revised Edition” into only 3 boxes: **BRW Kickstarter**, **BRWR**, & **Rotas** (using another short lid of your choice; Duel Lex pictured below). If you do not have the BRW Kickstarter box, there are two very clear layers in "Box 1" that can each be stored in Crono+Inferno. Either way, the less Black Rose Wars stuff you have, the less useful my design will be for you:

- ★ **Black Rose Wars** Kickstarter (OR retail with Summonings and Brute Force models), **Hidden Thorns**, **Sator** Box, **Crono**, **Inferno**, **Ordealia** (or Ordeal promo), and Familiars: **Cerebus**, **Draco**, **Griffin**, **Hydra** (except components duplicated in Rebirth and tokens replaced by models)
- ★ Dungeonology crossover: **Rocca Civetta**
- ★ Nova Aetas Renaissance crossover: **Magister**, **Draco**, **Hyperion**, **Medicio**, and **Minotaur**
- ★ **Duel: Lex** and its promos (except components duplicated in Rebirth)
- ★ **Duel: Void** and its promos (except components duplicated in Rebirth)
- ★ **Rebirth**, **Deadly Mask**, **Rotas** Box, **Apocalypse**, **Dread Forge**, **Gaea Reborn**, **Seal of Fire**, **Jukas**, and **Irene**
- ★ Ashes Magazine promos (**Cthuly**, **Helblindi**, **Cosma**, **Fabio**, **Razvan**, and **10th Anniversary**)
- ★ All single-card promos
- ★ PNP: **Christmas School of Magic** & **Spurchia** (I would highly recommend printing the [upgrades/mods posted by mrslurpy](#) with the directions provided there)
- ★ Includes room for other 3DP upgrades (e.g., BRW [snap bases](#)) and PNP extensions (e.g., the [Avatar-to-Mage conversions by mrslurpy](#))

- ★ There is also room for everything upcoming from **Requiem: Downfall of Magic**, except perhaps the giant Selene model
- ★ There is still some wiggle room, but I do not guarantee that this will fit the new content from the Revised BRW campaign
