I. INTRODUCTION (Calibri Light, 12 BOLD)

The introduction of the paper should explain the nature of the problem, previous work, purpose, and the contribution of the paper. The contents of each section may be provided to understand easily about the paper. 80% referral is mandatory from journals, the remaining 20% can be from books, etc. from the last 10th issue (for example, your manuscript will be published in 2020, then the max reference is published in 2010). (Calibri Light-12)

II. METHOD (Calibri Light, 12 BOLD)

This section describes when the experiment has been performing. The researcher explains the experimental design, equipment, data collection methods, and types of control [the core content of this research method is more or less the same as in the thesis and dissertation, but the summary is not as complete as in the thesis and dissertation]. If the experiment is carried out in the field, the writer describes the research area, location, and also describes the work carried out. The general rule to

remember is that this section should be detailed and precise so that the reader has the necessary knowledge and techniques for publication. The sequence is a type of research, reasons for taking at the location, data sources and informants, data collection techniques, data analysis, and checking the validity of the data carried out. Finally, the focus of the research is almost the same as in the introduction of the research objectives, but in this research, the method is more specific. (Calibri Light-12)

III. RESULT AND DISCUSSION (Calibri Light, 12 BOLD)

To ensure a high-quality product, diagrams and lettering MUST be either computer-drafted or drawn using ink.

Figure 1. schematic understanding of appeal (Exp for diagram)

Figure captions appear below the figure, are flush left, and are in lower case letters. When referring to a figure in the body of the text, the abbreviation "Fig." is used. Figures should be numbered in the order they appear in the text.

Tabel 1. Composition of Curriculum Structure of Islamic Law (Exp for table)

2.	Science and Skills Course (MKK)
3.	Working Skills Course (MKB)
4.	Working Behavior Course (MPB)
5.	Community Life Courses (MBB)

Table captions appear centered above the table in upper and lower case letters. When referring to a table in the text, no abbreviation is used and "Table" is capitalized. Figures and tables should be included in the running text itself. (Calibri Light-12)

IV. CONCLUSION (Calibri Light, 12 BOLD)

A conclusion section must be included and should indicate clearly the advantages, limitations, and possible applications of the paper. Although a conclusion may review the main points of the paper, do not replicate the abstract as the conclusion. A conclusion might elaborate on the importance of the work or suggest applications and extensions. (Calibri Light-12)

V. ACKNOWLEDGEMENTS (Calibri Light, 12 Bold)

An acknowledgement section may be presented after the conclusion, if desired. (12)

A reference list MUST be included using the following information as a guide. Only cited text references are included. Each reference is referred to in the text by a number enclosed in a square bracket (i.e., [3]). References must be numbered and ordered according to where they are first mentioned in the paper, NOT alphabetically. Reference must use reference manager, exp: mendeley, endnote, etc. in APA style format.
