

THE MOST IMPORTANT THING: YT guards itself from bots. so if a user exhibits bot behavior, they will cancel the views from the user.

Bot behavior:

- Auto-liking a video (liking before 10-15 seconds, or before the page of the video is fully loaded)
- using the words "stream" or "streaming" on the comments
- using emojis on the comments
- 1 playlist used by multiple people / accounts
- Refreshed video pages
- Multiple open tabs from the same account
- Multiple views from the same account / browser

!!! Bot behaviors would cause the videos to FREEZE and YT will not count the views or even DELETE the views.

YT Algorithm:

- If videos are repeatedly watched youtube, it stops considering your views as a legit one at some point, **especially if signed in**
- for example if a video is viewed a hundred times, only 5-10 views are counted because youtube is taking note of your IP
- using VPNs while streaming shifts on the algorithm because youtube might think you're a bot

Instead:

- Use **multiple browsers!** Ecosia, Safari, Google, Internet Explorer, Mozilla, etc
- Watch 2-3 videos in between, and then watch the mv again. Repeat.
- No need to log in and log out of your accounts every after stream.
- Like and comment on the MV. Hype up your bias! Hype up the MV. **DON'T ENCOURAGE EACH OTHER TO STREAM IN THE COMMENTS.**
- Don't delete the watch history!
- If you use playlists: **don't loop / create a unique playlist for yourself!**
 - Don't share your playlists to other carats and let your Carat friends create their own playlists! Youtube counts the number of playlists created, too!

ANOTHER TECHNIQUE WE HAVE NOT TRIED YET:

embedding the MV on websites

- These views count
- websites like Weebly where you can embed videos:
 - Carrd
 - Wix
 - Wordpress
 - Webflow
 - Squarespace (may subscription 'to so this is out of the options)
 - Format
 - Tumblr
- we have to embed the MV on a website where there is traffic so people can click on it
- if they view the MV enough seconds (30 seconds to 1 minute) it will count as 1 view
- **So we need Carats embedding the MV on websites and Carats clicking on the those videos on the website**
- This increases the views faster bc they don't have the complication of YT guarding the videos from bots, the clicks are counted as separate views
 - **WE CAN WATCH WEBSITE LINKS IN MULTIPLE TABS AT THE SAME TIME!**
 - **This means a FAST increase in MV videos in a short amount of time.**

<insert embed link here>

Other notes:

- Concentrate on youtube, even sacrifice the Vlive video for now
 - The more views on YT, the more social points for music show wins.
- SHARE THE MV LINK ON YOUR SOCIAL MEDIA ACCOUNTS: twitter, facebook, pinterest, anywhere
- if possible, don't share cut clips of the MV twitter
- the video will gain traction if people are consistently talking about it while sharing the video link: **search it on search engines like google, msn, bing, ecosia, etc**

EMBED THE MV ON YOUR CARRD FOR A CHANCE TO WIN ANY SVT MERCH OF YOUR CHOICE
