Unique skill: Storm breaker - Storm breaker has the ability to store up energy and redirect it, as long as there's some energy in Storm breaker then he can redirect it

Storm toss: →↘→ +ATK: Bill tosses storm breaker, compared to a regular hammer toss the hammer will stay out for a certain duration before returning to him, while it's active on the field it does damage/chip to opponents close to it

Korbinite punishment: ← ↙ ↓ → + ATK; Bill command grabs the opponent, tossing them in the air then throwing storm breaker up at them before watching both of them come crashing down in front of him.

Mighty strike: ↓↘←+ATK: Bill takes a stance and propels himself up in the air before crashing down.

Storm breaker shield!: ↓↓+ATK: Bill puts up a large shield of energy defending him from attacks, bright side is you can keep this shield up as long as you want. Downside is that it's tied to his unique ATK and can drain depending on how much is poured onto him
