

Privacy Policy

This Privacy Policy describes the privacy practices of AI Baby Generator - Face Maker mobile application.

AI Baby Generator - Face Maker is a photo and video editor that allows users to edit portraits based on neural network technology that automatically generates highly realistic facial transformations.

AI Baby Generator - Face Maker only uploads to the cloud the photographs that you specifically select for editing. Photographs are temporarily cached on the cloud servers during the editing process, and encrypted using a key stored locally on your mobile device.

Photographs remain in the cloud for a limited period of 24-48 hours after you have last edited the photograph, so that you can return to the image and make additional changes if you so choose.

We do not use the photographs you provide when you use AI Baby Generator - Face Maker for any reason other than to provide you with the portrait editing functionality of AI Baby Generator - Face Maker.

Videos are edited locally on your device, so you don't provide us with videos when you use AI Baby Generator - Face Maker, and we don't collect, use and share your video information.
