ABSTRACT

The abstract should provide a brief background of the problem (preferably 1-2 sentences), a clear objective of the paper, methodology (research design, sampling, instruments, procedures, and data analysis), main outcomes and results, and the conclusions. Standard nomenclature should be used and abbreviations should be avoided. No literature should be cited. Please follow word limitations (150-250 words). Reflecting on the substance of the whole contents of the article and enabling to help readers to determine relevance to their interests and decide whether or not to read the full document. The abstract consists of a statement about the background, the objective of the study or focus of discussion, method or important research steps, results and discussion, and conclusion.

Keywords: Keywords consist of 3-5 words arranged in alphabetical order, separated by comma

1. INTRODUCTION

This paper provides a template for preparing papers for electronic production of the Jurnal Pendidikan Impola. A well-prepared abstract enables the reader to identify the basic content of a document quickly and accurately, to determine its relevance to their interests, and thus to decide whether to read the document in its entirety.

Article Type

Articles are original articles of research results or review results from previous articles. Articles can be written in Indonesian or English. The number of pages of articles between 10 - 12 pages includes a list of references. The systematic writing of the research article consists of title, author's name, institution and correspondence address, abstract, keywords, introduction, methods, results and discussion, conclusions and suggestions, gratitude and reference list. (Aditya Dharma, 2019; R. N. K. Rambe, 2018). The systematic conceptual article writing (containing the results of the review) consists of the title, author's name, institution and correspondence address, abstract, keywords, introduction, core part, summary and list of references.

The title of the article is written using 16 size Arial letters, capitalized, bold, Align Right, consisting of a maximum of 15 words and describing the contents of the manuscript. The author's name is written using the size 12 letters Arial not accompanied by a title, the first name is abbreviated while the last name (surname) is not abbreviated. Names of authors from different agencies are marked using a superscript behind the name. Manuscripts are presented narratively (without numbering in front of subtitles) and presentation in the form of subtitles is avoided. The formula is written separately not in the sentence and equipped with numbering on the right. The formula is written using Microsoft equation.

$$x + y = 2 \quad (1)$$

The picture is inserted in the *text box* and the *figure caption* is placed below the image. The caption of the image is numbered and the image must be referred to in the text. Captions begin with *uppercase* letters. Captions of images with more than one line are written using line spacing 1. The image is drawn with a line width of 1pt and should have good contrast quality.

Figure 1. Plots of lineation (L) and FeO content showing negative correlation

The table is created with a line width of 1pt and the table caption is placed above the table. Information on tables consisting of more than 2 rows is written using 1 line spacing. The table lines are only horizontal lines while vertical lines are omitted. Example of how to write [Table 1](#).

Tabel 1. Tabel Siklus 1 Hasil Belajar Siswa Dalam Siklus 1

No	Nama Siswa	Nilai	Predikat
1	Budi	80	Tuntas
2	Rudi	70	Tuntas
3	Putu	70	Tuntas

2. METHOD

Contains how data is collected, data sources and ways of data analysis.

3. RESULT AND DISCUSSION

Result

Results are the main part of scientific articles, containing: final results without data analysis process, hypothesis testing results. Results can be presented with tables or graphs, to clarify the results verbally.

Discussion

Discussion is the most important part of the entire contents of scientific articles. The objectives of the discussion are: answering research problems, interpreting findings, integrating findings from research into existing sets of knowledge and composing new theories or modifying existing theories.

4. CONCLUSION

Contains conclusions and suggestions. Conclusions include answers to research questions. Suggestions refer to the results of the study and take the form of practical actions, mention to whom and for what advice is intended. Written in essay form, not numerical form.

5. ACKNOWLEDGE

If any, thanks are addressed to official institutions or individuals who have provided funding or have made other contributions to the research. Acknowledgments are accompanied by a research contract number.

6. REFERENCES

The references consist of the author's name, year of publication, article title, city name and publishing institution. The reference list is sorted according to the first letter of the author's name (A-Z). The second word in the name agreed as a family name. Authors may follow the APA 6th Publication Manual to write references. All references referred to in the text must be written in the reference list. Preferred references are articles taken from the latest journals / publications no later than 5 years before article submission (paper submission). Example of how to write references:

- Ary, D., Jacobs, L.C. & Razavieh, A. 1976. *Pengantar Penelitian Pendidikan*. Terjemahan oleh Arief Furchan. 1982. Surabaya: Usaha nasional
