

**S.L:Grab the newest technique of the era before your competitors do.**

Hey Mitchelle,

I found your website “Making sense of cents” and It’s true that alot of people are suffering from student debt. I I believe that your story would come off as a great inspiration to them.

I want to help you in your mission and the way I can contribute to it is by introducing you to a new technique which will alow you to significantly increase traffic to your website.

This technique isn’t time consuming and is guaranteed to show results. If you don’t believe what I'm saying then I suggest you take a look at “Robert kiyosaki”.

He’s a passive income coach and uses this same technique. He has at least 3 million subscribers.

The technique i’m talking about is called “The Half Value Giveaway” Method.

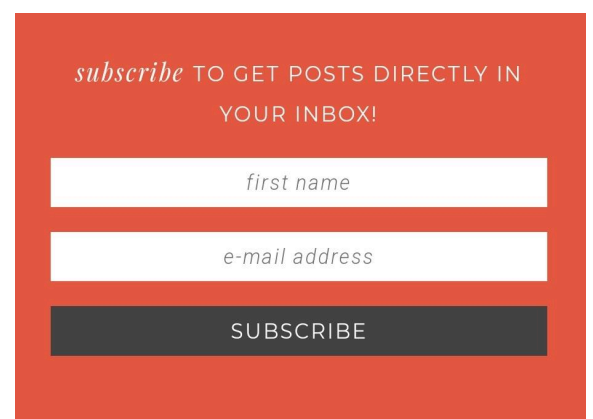

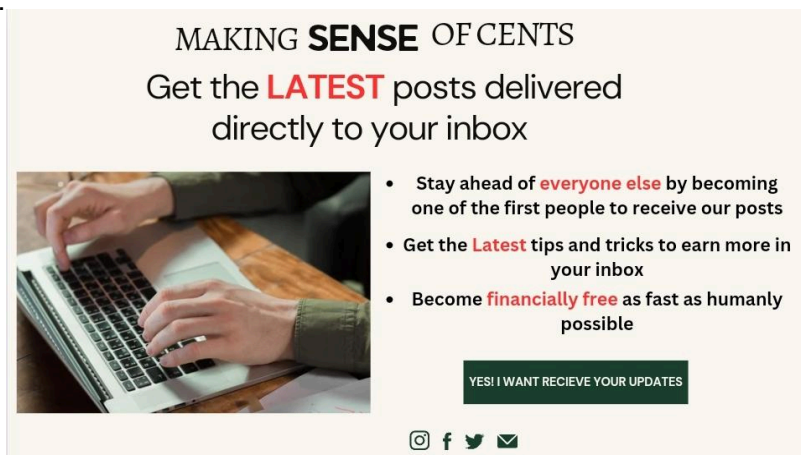

The technique consists of 5 stages and after taking a look at your social media account and website I believe that you’re on the 2nd stage.

I can help you get to the Fifth stage in a matter of weeks.

If you’re thinking that this is probably too risky, then I advise you to rest assured. You are not bearing **ANY** risk, **I AM**.

If you work with me and don’t get the results you expected you don’t have to pay me a cent. I believe in genuine partnership and teamwork. So if you’re not growing nor am I.

Here’s a landing page I made based on this same technique and besides it is the one you currently have.

I’ve also written an email that you can try out for free and see the great results it generates.

Your website has great potential and with this strategy there will be people flooding into your website in no time.

Right now you have **three** choices:

**ONE:** You can forget about this email and miss this opportunity to improve your website and its traffic.

**TWO:** You can take the information I provided you with and try to figure this out on your own... OR

**THREE:** You can get back to me and i'll show the *EXACT* way we'll make your website go from 20 million readers to 40 or even 50 million.

In the field of business speed is essential. I suggest we get you started on this technique before any of the other blogs do and it becomes common.

Well wishes,

Hareem

**P.S:** Here's the [LINK](#) to the website page I designed.

**P.P.S:** Here's the [LINK](#) to the email i wrote to that you can use for free.
