

:ID:'S LIST OF EXPLAINY STUFF FOR DUBTRACK.FM

[HTTPS://WWW.DUBTRACK.FM/JOIN/INDIE-DISCOtheque](https://www.dubtrack.fm/join/indie-discotheque)

Most is self explanatory, but here are a few tricky things:

This is where most of the magic happens:

This is where you Search for songs, manage your playlists, and also get added to the DJ Rotation Queue. The pink number is how many songs are ahead of you in line.

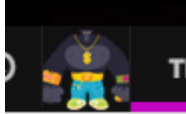

VOLUME

"ROOM QUEUE" - Who is currently DJing, and the next song they're about to play

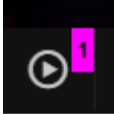

History

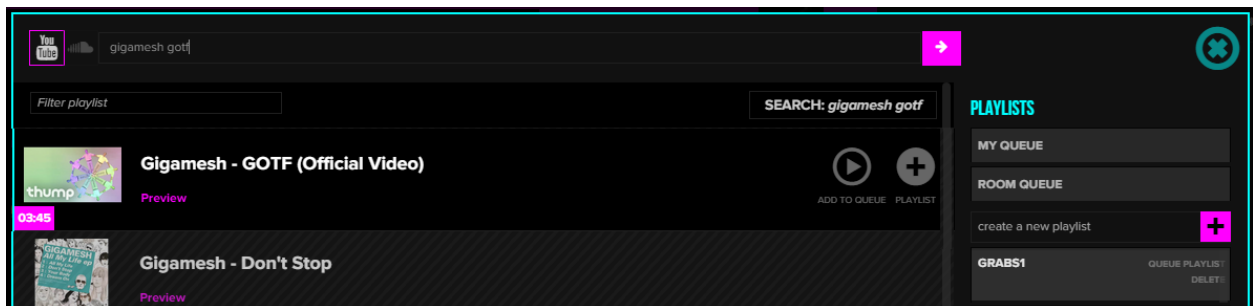

Avatar of who's playing the current song. Click on the Avatar, and find their name, and access to their profile.

MANAGING SONGS and PLAYING SONGS

Click:

Get:

The idea, is you add songs to Playlists, and then you take the songs and add them to your QUEUE.

You put a song in Queue, and you are automatically added to DJ List to play that song when it's your turn.

Search for YouTube and SoundCloud songs on the top bar.

"ADD TO QUEUE" means it adds you to the DJ list and plays this next (if you're not already on the list).

"+ PLAYLIST" - you can add to a playlist, or create a new one

"MY QUEUE" - the songs you're currently in line to play

"ROOM QUEUE" - Everyone in line on the DJ List

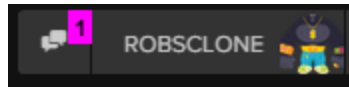

Mouse Over a Playlist on the right side and get:

You can Queue your entire playlist, and this will make it like you had selected that playlist on Plug.

OTHER STUFF

On the top:

Private Messages (native!) and Your Profile. You can edit name and avatar.

On the bottom:

<3 - "Grab" this song to a playlist

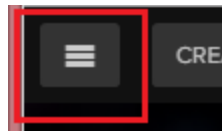

^ - upvote ("dub a song")

9 - current score of song in dubs

v - downvote

ONE IMPORTANT THING

Top Left Corner:

The three lines will get you back to Chat and Video in the room you're in (click it and then click "Indie Discotheque").

That's it.
