History

Kit Hood

- He was born to Mallow who was sick and was adopted by Kestrel and got super close to her due to this. He is his mama's boy and is super friendly with her and his littermates, colony-mates, and others.
- He has grown to like Kestrel a lot, he doesn't really know his biological parents and doesn't really think of them and instead just considers Kestrel to be his mother, growing to be his mama's boy, biological or not.
- Talon really loves his siblings and would get around a lot to ask random questions, whether ones that were stupid like "If you could replace all of the grass in the world with something else, what would it be and why?" or something actually understandable to question like "What do you think are the five most beautiful things in the world? Why?" But a lot thought it was cute for him to ask questions, just to learn about others.
- During his kit hood, one of the members of his colony, Rosefinch, was kidnapped, he was sad, he had grown to like Rosefinch and even see them as another parent or a parent figure. He grew almost depressed until Red-Tail

came in, hoping to distract Talon, even if just a little, by teaching him sign language after he accepted. It was hard for him to grasp but through the lessons and him getting more understanding and older, he found that he was getting pretty good with it.

- At the same time Rosefinch disappeared, Flight Colony had announced they would be at war with Flytrap Colony. Talon understood this and would always wish the fighters of Flight Colony well throughout this, though he'd mostly try to not think about it, he hated the idea of war and violence.
- He's made friends

Growing up

- Growing up he had still gotten pretty close to Kestrel and his siblings, always looking up to her for everything. When Rosefinch, one of the members of his colony got kidnapped, she would heavily protect him and his siblings. He liked it for the most part but eventually noticed how her bunch of protection was due to Rosefinch missing, and he saw she wouldn't really take care of the colony.
- He appreciates his mom but he still wished Rosefinch was never kidnapped and Kestrel wasn't so protective.
- He tested he/they for a while before feeling that he was a demiboy and coming out to Kestrel about it, before the rest of the Colony.
