Littoral plants maintenance request form

Any of the native littoral plant species (Alligator-Flag, Jointed Spikerush, Giant Bulrush, Soft-stem Bulrush, etc.) installed in the lake that happen to overpopulate around any of the docks may be thinned or removed (& re-planted), as approved by the Lakes Board, to maintain access and clearance for boating, angling, etc.

Littoral plant removal and planting is a strenuous and potentially hazardous operation to both people & wildlife and is best left to the professionals.

HOW TO SUBMIT A REQUEST: Please provide the below information in an email to info@rainberrylakeboard.com. The board will review and coordinate maintenance with our vendor as part of our regular littoral shelf maintenance service.

Resident Name (First and Last):

Resident's Preferred Contact (please provide email or phone # for updates on this request):

Home Address:

Is the requested maintenance location related to a dock (yes or no)?

If Yes, please describe location dock (i.e. directly behind house address or 3rd dock from lake gate on east shore) :

Description of Work Requested (please describe location of overgrowth and the desired result)

In addition to the brief description above, please include images in the email request (if possible).
