

Privacy Policy for Minimalist Tab Manager

Data Collection: The Minimalist Tab Manager extension collects non-personally identifiable user data (specifically, **Web History: tab URLs and Titles**) and **User Activity** (tab creation/updates) solely for the purpose of the extension's core function: automatically enforcing the tab limit, archiving, and restoring user sessions within the browser.

Data Storage: All collected data (archived sessions) is stored **locally** on the user's device via Chrome's `chrome.storage.local` API. This data is never transmitted to our servers or any third party.

Contact: For questions regarding this privacy policy or data usage, please contact us using the support form linked below.
