

Harmony Bio Study inc. FAQ

* **Who are you guys? What is Harmony Bio Study inc?:** We are a facility here in “Greenhoof Valley” on the west side of Equestria. HBSi (Harmony Bio Study inc) is a family owned business, created, ran and founded by the “Flower” family. Building off the idea of both artificial and nature in one, creating a safer environment for every-creature. It has been around ever since the beginnings of Greenhoof, this family even helped to build our town from the ground up!

(For more information, please find and read the [“Greenhoof Beginnings”](#) pamphlet.)

* **Did these creatures come from another planet?:** We believe so! They did come from a meteor that fell from the sky, so that is our only clue we have. Another answer is they could be born from this meteor, but we are still not too sure.

* **Can Monchers be domesticated?:** Yes they can! As long as you follow our guide as to how to take care of one, you can have your very own Moncher in no time!

(Read more on the [“Moncher Adoption System”](#) section of the [Moncher infobook](#).)

* **Monchers can be anything??:** Technically, yes! It all comes down to how they’re raised, it can resemble whatever it may be with its fur colors and type. It’s like gaining a cutie mark for your whole body!

* **What happens when a Moncher deceases?:** We learned that when a Moncher passes, its other kin hold a kind of funeral for them, no matter where the body went.

But their spirit moves on and becomes a Spirit Type!

(Read more on [“The Rejoice Event”](#) section of the [Moncher infobook](#).)

* **How long do Monchers live for?:** We’ve estimated around 30 to 40 years. The shortest has been 25, while the longest for an average Moncher is 50. Onyx however, has lived for as long as the species has been around, even though he grew up faster than the other Monchers have! We believe it was chosen by their own accord in some way, making them not only the first, but the leader of the species here on earth.

* **Do Monchers enjoy music?:** Yes! They even make music of their own by making little chirps and whistles that turn into a melody. Some tunes are common among Monchers, but others they’ve adapted from hearing our radios sometimes! They always love to dance and sing along to the tune, no matter what it is.

* **Can Monchers wear clothes?:** If the clothes fit, then yes! They are very comfortable in wearing clothes, as they have made armor and other accessories for themselves before. Don't forget about the scarf Onyx always wears! Don't worry, they wash it themselves to keep it clean. We even have Moncher specific clothes you can buy at Sweet Valley Needs anytime for your own Moncher!

* **Can other Moncher breed with each other?:** When it comes to Earth Types, yes they can, and they can become hybrids that way too! Sometimes they turn out one or the other, but we have seen insect/flying, aquatic/shiny, even forest/inferno can work with each other. And these are just some of the limitless possibilities of Monchers!

* **Can Space and Earth Monchers breed with each other?:** When it comes to that, no they cannot. Due to their rituals and reproduction organs being so different, there hasn't been a plausible way of breeding with each other. At least not yet. The closest thing we've seen is an Earth Type representing something from Space, and only a couple Space Types representing something on Earth.

* **Can a Moncher be a theme of colors or fur patterns that may resemble another Moncher, but still stay different?:** Of course! There have been Monchers with the theme of the ocean, but don't count as an Aquatic Moncher. As well as ones with fire-like patterns, but they don't count as an inferno moncher. That is because they may find ocean-like things, something they like or grew up near, but never got the ability to become that type growing up. So it is possible for one to not become that type, while still having the colors and patterns!

* **Can Monchers play video games?:** If you teach them well enough and give them an easy to access controller, yeah they can! Their intelligence is around the same level as ours, so video games are a high possibility for something they can do.

* **Do Monchers speak english?:** They do not, but they do understand it very well! How they communicate their language is by expressing through animal sounding noises, as well as physical movements with their body.
(Read more on the ["Moncher Communication"](#) section of the [Moncher infobook](#).)

* **Do Monchers sing?:** They sure can! Using their muscles within their voice box, they can mimic certain melodies, even make some up! There's some melodies that are even specifically known from the Monchers species that can be heard within the valley every so often.

* **Do Monchers have Sexualities/Identities?:** Some do, yes! Trans Monchers do exist within the valley, as males curl up their fur, and females can straighten their fur by

using certain fur solutions. As well as Non-Binary and Genderfluid Monchers! It's always a pleasant and welcoming time when pride month comes around the valley. (Read more on the ["Reproduction and Socialization"](#) section of the [Moncher infobook](#).)

* **Can Monchers themselves have pets?:** They can! The pets they take in of course are smaller than a monchers, like bunny's, birds, turtles, even fishes and insects.
