

NEW! FLOWER SEEDLING BOX

Grow a colorful cut flower garden all summer long

We're excited to offer a new seedling sale option this year: a curated set of flower seedlings featuring varieties that are **easy to grow** and **cut-and-come-again**, meaning you will have a bountiful cut flower garden all summer long. The flower seedling box will also be **plastic free**, meaning no plastic cell packs or trays. Instead, flower seedlings are being grown in **soil blocks** - which are made by compressing soil into a free-standing cube - and will be delivered in a cardboard tray.

The flower seedling box will include **24 organic flower seedlings**, featuring unique varieties (listed below) and an emphasis on bright, saturated colors. Wondering how much space you'll need? If using 9" spacing, you'll need about 15 square feet of space to fit them all.

VARIETIES
