

Below are the rubrics I will use to grade your projects.

Final Project (20% of course grade)

___/20 points: Document and explain any of your code or changes to other's code (If modifying someone else's code, be SURE to clearly cite them at the beginning of your file, and start each comment with #. If you're writing original code throughout, any style of comments is fine.)

___/30 points: Creative, meaningful, interesting, OR substantial (As judged by peers)

___/20 points: Attendance and thoughtful critique of peers

___/30 points: Demonstrate that you learned something new and substantial (As a comment at the beginning of your file. Explain in 1-3 paragraphs what you worked on or accomplished throughout the project.)
