

# BIZ POS PRIVACY POLICY

## DATA COLLECTION

BiZPoS collects but does not share any user data to third party entities. Everything you do in the app is completely private and visible to you and your added users.

### **Collected data:**

**Phone Number :** This helps us send you SMS notifications concerning any major changes and directives necessary for your continued use of our application.

**Email :** We collect your email address for the purpose of Email notifications and Authentication.

**Full Name :** This data is necessary for account personalization and audit logs. From the full name, we are able to let you know who accessed what and when.

## DATA SECURITY

BiZPoS has employed enough measures to ensure that client data is safe from any malice.

**Data Encryption:** We ensure that your data is hashed while on transit and decrypted on the server and vice versa.

**Collection of only required data:** We have ensured to collect only data we require for the applications functionality.

**Note:** This application allows different account logins per device and runs the application on different terminals (meaning transactions are in sync across different devices). To help secure your data, always ensure to sign out from your session before leaving the device.
