

Digital Generation Reflection

Based on [this presentation](#), class discussion, readings, videos, and your personal opinion – respond to the following questions in a new Blog Posting.

- Do you see yourself as a digital native or a digital immigrant? Why? How does that impact your potential to meet the needs of your future students?
- What are some key points about the digital generation with which you agree? With which you disagree?
- Read “[Digital Nativism](#)” by Jamie McKenzie. Revisit what we talked about in class. Who is right? Who is wrong? What does this mean for teaching and learning in your classroom?
- Write a summary for the Class of 2025 (current fourth graders) like the [Beloit College Mindset List](#). What would their Mindset list look like? What historical events happened before 2004 (the year they were born) that will have a different meaning for you than it will for them? Just include 5 or 6 items.
