Abstract (11 pt, bold)

(one blank line of single space, 10 pt)

Abstracts are written in two languages (Bahasa Indonesia and English). Abstract is written using Times New Roman with font size 10, and single space. Abstract in English is displayed after Indonesian Abstract. The abstract should include the content of the journal, including the purpose of the research, the research method, and the results and conclusions of the journal. Abstract should not contain any other references or display equations. Abstract no more than 200 words. (one blank line of single space, 12 pt).

Keywords: Maximum 5 keywords with Time New Roman (10 pt, regular)

Articles written in Times New Roman 11 pt, single space, left right (justify) with margin top 2.5 cm, bottom 2 cm, left 3 cm and right 2 cm with A4 paper type (210 mm x 297 mm) and written in the form of a 1 column page layout. Articles written at least 6 pages and a maximum of 12 pages. All submitted articles should be written in good and correct language and include aspects of the introduction, research methods, results and discussion, and conclusions with the following format of writing.

1. INTRODUCTION (12 pt, bold, capital letters)

(enter, single space, 11 pt)

The author should describe the background of research briefly, the importance of the research, objectives and benefits of the research. Introduction is written in Times New Roman font 11 pt, single space.

(enter, single space, 12 pt)

2. RESEARCH METHODS

(enter, single space, 11 pt)

In the research method the author should write down the entire material including the tools and materials used including the specifications. The authors should also include clear research procedures. The research method is written in Times New Roman font 11 size, single space.

(enter, single space, 12 pt)

3. RESULTS AND DISCUSSION

(enter, single space, 11 pt)

Results and discussion are written in Times New Roman with 11 pt size, single space. Results and discussion should be clear and provides an explanation of all the data of research and data linkage with the theory and the results of previous research conducted by other researchers. The discussion should explore the significance of the research results, avoiding overly broad quotes from the literature.

Discussion is the most important part of your article. Here you get a chance to sell your data. Make the discussion in accordance with the results, but not repeat the results. The following components that should be covered in the discussion are: How does the research result relate to the original question or objectives outlined in the Introduction section? Does the study provide a scientific interpretation for each of the results? Are your results consistent with what other researchers have reported (what else)?

Tables and graphs can be used to clarify the presentation of research results verbally. Tables and figures must be provided commented or discussed.
