The OpenDAO Foundation Launches - AI DAO Network

The AI DAO Network is pleased to announce that the AOS Foundation has launched a new token to support the AOS network. The AOS TOKEN is the governance token of the AI DAO network. With the exception of strategic investors, AOS tokens can only be airdropped and destroyed through SOS issued by way of casting.

Introduction to AI DAO Network:

The AI DAO Network is a decentralized financial protocol based on OpenAI (ChatGPT), dedicated to bridging the gap between artificial intelligence (AI) and the world of cryptocurrency. It aims to allow billions of ChatGPT users in the future to enter the Web 3.0 era. In the world of the AI DAO Network, users can use AI to manage cryptocurrency, send encrypted information, participate in AI+DEFI pools, use AI to deploy smart contracts, and greatly improve work efficiency and APY.

Airdrop Details:

AOS is a multi-chain token that was deployed on the Binance Smart Chain in the early stages. On the snapshot date, centralized exchanges, L1, L2, SOS token holders, and $veSOS in pledge can claim 10000:1 AOS airdrops on the BSC chain. Unclaimed AOS tokens will be deposited into the foundation treasury.

The snapshot took place on the first block after 00:00 UTC on March 28, 2023.

AOS Token Economics:

Total amount of $AOS tokens: 10,000,000,000

Early circulation: 3 billion tokens

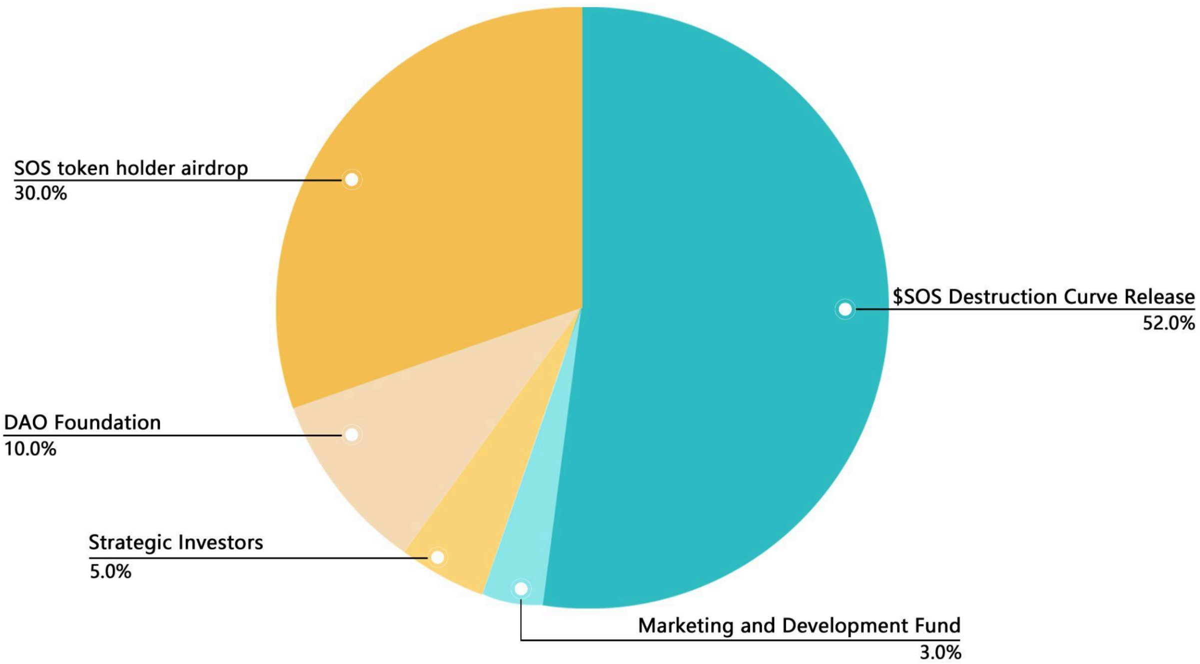
5% Strategic investor tokens are locked up for two years and will be released after 24 months.

30% Airdrop for SOS token holders will be released immediately.

10% DAO Foundation tokens are locked for two years.

3% is allocated for the Marketing and Development Fund.

52% $SOS burning curve tokens will be issued.



The AI DAO Network website will be updated with more details in the coming days. Please stay tuned for further information.
