Best Drag Wigs

This is a review of the best drag wigs in 2021.

Drag wigs are so popular because of their unique and playful style that they immediately transform you into character with little effort. My name is Lauren, and I have been using wigs for years, not just for daily wear but for dressing up in costumes. I've experimented with wigs for temporary to more long-term wear and love the solutions they provide.

If you are looking for a drag wig that will set the stage, then you want to try the BESTUNG Black Long Curly Wavy Women's Wig, as it is the best overall choice. This wig is big with bangs, styled in a classical 80s hairstyle, with some up and some down.

It comes in all black with bangs that are wide and full to give you that elegant 80s diva look. You don't have to worry about styling it as it has long loose curls throughout.

Yes, there are a number of other choices that will work as well and I will go through my top picks. We will cover the highs and lows of each choice so that you can make an informed decision.

Our Best Drag Wigs

- BESTUNG Black Long Curly Wavy Women's Wig (Best Overall)
- DINIFER Copper Red Hair Wig (Best Red Hair)
- Rubie's Women's Miss Conception Wig (Best 70s)
- PINKSHOW Pink Lace Front Long Wig (Best Pink Hair)
- Kalyss Blonde Beehive Women's Wig (Best Blonde Hair)

Five Best Drag Wigs Reviewed

In this section, check out my top choices for the best drag wigs with a detailed review of each option below.

BESTUNG Black Long Curly Wavy Women's Wig

- Key features: pre-styled, synthetic fibers, medium cap size
- Volume: 15.1 oz
- Hair Color: Black, Copper
- Best for: Overall

If you are looking for an 80s style wig that can fit any look or theme, then this is the wig for you. It comes pre-styled in a some up and some down beehive classical 80s look. Its luscious curls add body and texture to this wig, making it a showstopper for a drag wig.

You don’t need to worry about using heating tools with this wig as it comes with synthetic fibers that will hold the style even after you wash it. This wig will fit normal to average head shapes, its medium cap size offers a comfortable and secure fit.

There are two color options, black or copper, and you can tailor this wig to fit any outfit you choose. The bangs can be worn straight down or brushed to either the right or left side.

There are really no downsides to this wig but it can be too much hair for one person. This might be overwhelming for the average person. For this reason, I would suggest another wig.

DINIFER Copper Red Hair Wig

- Key features: heat friendly synthetic fiber, swiss lace, big waves
- Density: 130%
- Hair Color: Copper Red
- Best for: Red Hair

This copper red wig will turn you into the ultimate Jessica Rabbit, with its long and big waves. This wig is stunning not only because of its color, but because it has volume, texture, and shine throughout.

It’s made with heat friendly synthetic fibers, making it easy for styling with healing tools up to 320F. It comes on a transparent light brown swiss lace that can be easily parted in any direction and that will give you a natural and realistic hairline.

At 130% density, this wig is full and voluminous throughout. This is a great glueless wig that comes with stretchable straps and 3 combs to fit small to larger head sizes.

This wig has a lot of curls and may not suit everyone's style. I would recommend trying another wig if you prefer fewer curls.

Rubie's Women's Miss Conception Wig

- Key features: 100% polyester, big hair, one size
- Volume: 9.6 oz
- Hair Color: Blonde/Brown
- Best for: 70s

Big hair is always a winner when it comes to drag wigs. You get a beautiful 70s bouffant style with this wig that captures timeless elegance and beauty.

This wig is made with 100% polyester fibers and is one size. It comes in a beautiful blonde and brown streaks color, epitomizing that classic 70s look.

It's framed with bangs that are also colored blonde and brown and that can be worn straight forward or on either side. The ends come curled, and this wig is pre-styled for you.

Unfortunately, this wig tends to shed a lot. It's great for a couple of wears but will not last very long. I recommend finding another wig with better hair quality.

PINKSHOW Pink Lace Front Long Wig

- Key features: heat resistant synthetic fiber, wavy, lace frontal
- Volume: 350g
- Hair Color: Pink
- Best for: Pink Hair

This beautiful pink wig is the perfect shade. It's a bit matte so that it's not too shiny and can offer a more realistic look. Its length is 26 inches of luscious pink waves.

You can style this wig to your liking, as it comes with heat resistant synthetic fibers that can be used with heat styling tools up to temperatures of 320F. You can part this wig any way you like on the lace frontal.

It comes equipped with adjustable straps and combs for a secure and comfortable fit. You will get a realistic look with this natural looking wig and it will blend effortlessly into your hairline.

This wig is offered in natural colors. It can look too costume-like with the other colors offered, so I would not suggest buying any color other than the pink.

Kalyss Blonde Beehive Women's Wig

- Key features: high heat premium synthetic fiber, curly & wavy, beehive
- Volume: 14 oz
- Hair Color: Blonde, Black, Black w/ brown highlights
- Best for: Blonde

The Kalyss blonde beehive wig is a stunner and will leave you feeling stellar and confident. This wig has a 1960s feel to it, with it being styled in a beehive hairstyle of some up and some down.

You are getting high heat premium synthetic fiber with this wig, making it easy to add your own individual style to it with heating tools that can be used up to high temperatures. This wig comes beautifully styled with long curly and wavy tresses, giving the ultimate retro look.

The blonde bombshell is a gorgeous color but there are also other colors if you want something that will blend with your skin tone better. It comes on a beautiful rose net cap with two adjustable straps for the perfect fit.

The only downside to this wig is that it can come across as looking too fake. It is not a lace wig and will require additional steps to make it look more realistic. If you prefer a natural looking wig, then I suggest trying another wig mentioned above.

Guide to Buying Drag Wigs

Take the following factors into consideration when you are screening out the best drag wigs.

Hair Quality

You can wear wigs for any amount of time, but how long you decide to keep your drag wigs are entirely up to the hair quality.

Most drag wigs will be made with synthetic hair fibers because of how big and extravagant they are. Changing hair colors are also easier to achieve in synthetic hair textures because of their affordability.

Many quality drag wigs can be obtained with just using synthetic hair, although polyester and other materials can be used too, the quality will not be the same.

Consider how long and how often you want to use your drag wigs before purchasing. This can help you avoid spending money on trash wigs and will also help you to invest in higher quality wigs.

Maintenance

You cannot own a wig and expect it to keep its quality without adhering to a proper maintenance routine. Having a routine in place can save you from having to buy wigs more frequently than you should.

If you are using synthetic wigs, it’s best to have a mild wig shampoo on hand to help in keeping your wigs thoroughly cleaned. Also, having detangling products on hand will keep your wigs looking smooth and in good condition.

Depending on how often you wear them, your washing routine should fall in line as frequently. Keeping a proper maintenance routine will save you money and headaches in the long run.

Hair Color

There are so many hair color options you can choose from when it comes to purchasing a drag wig. It is best to go for colors that are vibrant and that will enhance your look with what you wear.

You can always choose standard colors like black, brown, and blonde. However, drag wigs work really well with color and offer more pizazz than natural colors often tend to do.

If you are too afraid to try intense and bold colors for your drag wigs, you can start off with subtle color changes like burgundy or copper reds. They are still widely accepted as natural hair colors too.

My Verdict

Drag wigs can be a great addition to any look or occasion when you find the right one. Knowing the type of drag wigs available, their quality, and how to take care of them, can make all the difference when purchasing a drag wig.

My top pick would have to be BESTUNG Black Long Curly Wavy Women's Wig because of its excellent style and durability, and its ability to give a beautiful look with minimal effort.
