

ai4lam Registry Working Group Charter

May 4, 2020

Document Status: Approved by ai4lam Secretariat on May 12 2020

This WG will shape and maintain the ai4lam Registry of Initiatives, Projects & Resources

See <https://sites.google.com/view/ai4lam/ai-registry?authuser=0>

Objectives of the Registry

- Promote awareness of AI activities and resources within LAMs
- Enable people to find each other, and find and reuse each other's good work
- Provide inspiration for good ideas

Work packages

The registry - implementation

There is already a lightweight implementation of a registry which is in use. This version is based on a Google Sheet as holder of the information, and a light web interface to this sheet. A more scalable platform is wanted and needed.

Maintenance

The registry must be maintained over its lifetime, which will be a continuous responsibility for the Registry Working Group. Workflows for submitting entries must be established, so community members know how to add new items or make updates.

Funding

The work done by the group's members will be voluntary or paid by the respective institutions, and there is no need for extra funding.

Members and organization

- Svein Arne Brygfeldt, National Library of Norway
- Tom Cramer, Stanford Libraries
- Eileen Jakeway, LC Labs, Library of Congress

- Péter Király, Göttingen eResearch Alliance
- Thomas Padilla, UNLV
- Abbey Potter, LC Labs, Library of Congress
- Tim Smith, University of Oklahoma

The group will be chaired by XX

Meeting & Communication Channels

The group will use the same channels for communication and dissemination of information as AI4LAM, including the AI4LAM web site. Meetings will be carried out as network meetings. An email distribution list registry@ai4lam.org will be established.
