ABSTRACT

Abstract should include the research topic or problem, purpose of the research, method of the research, results, and implication. In one paragraph between 150 – 200 word. Above the article, justify, Book Antiqua 9. Written in sound English and Indonesian. Abstract should include the research topic or problem, purpose of the research, method of the research, results, and implication. In one paragraph between 150 – 200 word. Above the article, justify, Book Antiqua 9. Written in sound English and Indonesian. Abstract should include the research topic or problem, purpose of the research, method of the research, results, and implication. In one paragraph between 150 – 200 word. Above the article, justify, Book Antiqua 9. Written in sound English and Indonesian. Abstract should include the research topic or problem, purpose of the research, method of the research, results, and implication. In one paragraph between 150 – 200 word. Above the article, justify, Book Antiqua 9. Written in sound English and Indonesian.

ABSTRAK

Cakupan minimal yang termuat dalam abstraksi adalah: permasalahan, tujuan penelitian, metode, temuan dan implikasi. Disusun dalam 1 (satu) paragraph. Disajikan di bagian awal artikel, justify, Book Antiqua 9. Jumlah kata antara 150 - 200 kata. Ditulis dalam Bahasa Inggris dan Bahasa Indonesia yang benar. Cakupan minimal yang termuat dalam abstraksi adalah: permasalahan, tujuan penelitian, metode, temuan dan implikasi. Disusun dalam 1 (satu) paragraph. Disajikan di bagian awal artikel, justify, Book Antiqua 9. Jumlah kata antara 150 - 200 kata. Ditulis dalam Bahasa Inggris dan Bahasa Indonesia yang benar. Cakupan minimal yang termuat dalam abstraksi adalah: permasalahan, tujuan penelitian, metode, temuan dan implikasi. Disusun dalam 1 (satu) paragraph. Disajikan di bagian awal artikel, justify, Book Antiqua 9. Jumlah kata antara 150 - 200 kata. Ditulis dalam Bahasa Inggris dan Bahasa Indonesia yang benar. Cakupan minimal yang termuat dalam abstraksi adalah: permasalahan, tujuan penelitian, metode, temuan dan implikasi. Disusun dalam 1 (satu) paragraph. 1. INTRODUCTION

Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering (Berkman 1994).

Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the back-ground, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering (Cengel & Boles 1994).

Introduction should be about one page,

containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the back-ground, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering (Reid, Parsons & Green).

Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the back-ground, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering (Jull et al. 2008).

Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the back-ground, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering (Willmott 2004, 2006)..

Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the back-ground, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering (Dawkins 1996a, 1996b).

Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page,

containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the back-ground, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering (Dawkins 1996; Willmott 2004).

Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the background, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering. Introduction should be about one page, containing the back-ground, reasons to do the research, problem formulation, purpose of the research and without sub-heading, bullets, or numbering.

2. THEORETICAL FRAMEWORK AND HYPOTHESES

It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources (Australian Government Publishing Service 1987).

It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources (Pring 2004).

It describes the previously related studies as

the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources (ed. Sjostrand 1993). The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources (eds Pike & Sarkar 1986).

It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources (Bhattacharjee 1998).

It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources. It describes the previously related studies as the primary sources. The use of secondary sources of references should not dominate the total references. Quotation should be maximally one paragraph and/ or the gist of the quoted sources (Bernstein 1995).

3. RESEARCH METHOD

It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering. It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering. It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering.

It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering. It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering. It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering.

It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering. It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering. It comprises the procedures or steps of the research, e.g., from the methods of sampling to the data analysis, and presented in brief and concisely by numbering.

4. DATA ANALYSIS AND DISCUSSION

It presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures. Bourassa (1999) emphasized it presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures change (Bowden and Fairley 1996).

It presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary (Huffman 1996). Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures. It presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The

tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures (Daniel 2009).

It presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning (Donahue-Wallace & Chanda 2005). Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures (Exelby 1997). It presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures (Mortimer & Cox 1999).

It presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary (Rathbun, West & Hausken 2003). Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures. It presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning (Simpson 1997). Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation. The tables which are presented should not be the rough output but in the processed and brief summary (Porteous 2007). Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures (Albanese 2009).

It presents the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning (University of Queensland Library 2009). Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation (Bliss n.d.). The tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures (Cookson 1985). It presents

the analysis of the related results, theories, and hypotheses (if any) based on the writer's reasoning. Data analysis and discussion should be presented in brief but clear and it is not dominated by table presentation (International Organization for Standardization 1982). The tables which are presented should not be the rough output but in the processed and brief summary. Tables and pictures are presented consistently in the center and the titles are above for the tables and below for the pictures (Department of Mines and Energy, Queensland 1996).

5. CONCLUSION, IMPLICATION, SUGGESTION, AND LIMITATIONS

It is the closing of the article which reflects the essence and reasoning of the research by the writer. It is also logically based on the evidence taken from, and presented by the writer in paragraphs. Implication, limitations, and suggestions are also presented in paragraphs without numbering. It is the closing of the article which reflects the essence and reasoning of the research by the writer. It is also logically based on the evidence taken from, and presented by the writer in paragraphs. Implication, limitations, and suggestions are also presented in paragraphs without numbering.

It is the closing of the article which reflects the essence and reasoning of the research by the writer. It is also logically based on the evidence taken from, and presented by the writer in paragraphs. Implication, limitations, and suggestions are also presented in paragraphs without numbering. It is the closing of the article which reflects the essence and reasoning of the research by the writer. It is also logically based on the evidence taken from, and presented by the writer in paragraphs. Implication, limitations, and suggestions are also presented in paragraphs without numbering.

It is the closing of the article which reflects the essence and reasoning of the research by the writer.
