ABSTRACT

Abstract written in English. The abstract is written with Arial font size 8, and single spacing. The abstract should summarize the content of the paper, including the aim of the research, research method, and the results, and the conclusions of the paper. It should not contain any references or equations. The abstract should be no more than 200 words.

I. PENDAUHULUAN

The manuscript is written with Times New Roman font sizes 10, single-spaced, left and right aligned, on one-sided pages and on A4 paper (210 mm x 297 mm) with the upper margin of 1.5 cm, lower 1.5 cm, left and right each 1.5 cm. The manuscript written in two column format of 7.5 cm width and 1 cm spacing of each column. The manuscript including the graphic contents and tables should be between 4 to 10 pages. If it far exceeds the prescribed length, it is recommended to break it into two separate manuscripts. The manuscript is written in Bahasa Indonesia or English. If English is used, the Standard English grammar must be observed. The title of the article should be brief and informative, and it should not exceed 20 words. The keywords are written after the abstract.

The first letter of headings is capitalized, and headings are numbered in Arabic numerals. The organization of the manuscript includes **Introduction, Literature Review (optional), Research Methods, Results and Discussion, Conclusions** and **References**. Acknowledgement (if any) is written after Conclusion and before References and not numbered. The use of subheadings is discouraged. Between paragraphs, the distance is one space.

Abbreviations/Terms/Notations/Symbols. The use of abbreviations is permitted, but the abbreviation must be written in full and complete when it is mentioned for the first time and it should be written between parentheses.

Terms/foreign words or regional words should be written in italics. Notations should be brief and clear and written according to the standardized writing style. Symbols/signs should be clear and distinguishable, such as the use of number 1 and letter l (also number 0 and letter O).

II. TABLES

Tables are written with Times New Roman font size 9 and single spaced below the title of the table. The title of the table is written with font size 9 (boldface) above the table as prescribed in the format given below as example. The table is numbered in Arabic numerals. There is one single space line between the table and the paragraph. The table is placed immediately after it is referred to in the text. The frame of the table uses 1 font size line. If the title in each table column is long and complex, the columns are numbered, and the notes are given below the table.

Tabel 1. Number of Experiments of Light Exposure R=120K

No.	Experiments				Error (%)
	1	2	3	4	
1	23	33	34.7	2.89	21.9
2	12	32	25.2	1.88	30.6

A. Subtitles (11 pt, bold)

(one blank single space line, 10 pt)

 http://dx.doi.org/10.37253/telcomatics.v8i1.7359

Photographs, charts, illustrations, graph and diagrams are to be referred to as “Figure(s)”. Figures are placed symmetrically on the page and there is one blank single space line between the graphic content and the paragraphs. All figures are placed immediately after it is referred to in the body of the text and is numbered in Arabic numerals. Caption for figures is written below it and there is one blank single space line between it and the figures. The caption is written in font size 9, boldface, and placed as in the example. Between the figures with the body of the text there are two blank single space lines.

(one single space, 10 point font)

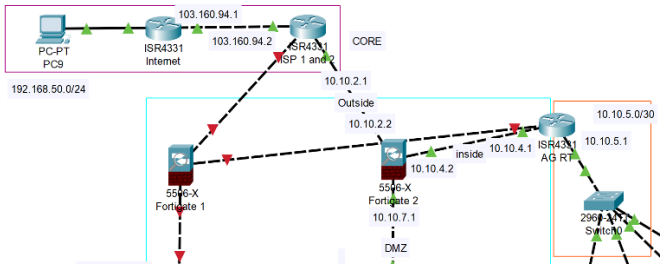

Figure 1. Failover Test Scenario (8 pt)

For any figures which have been published by another author, the corresponding author must obtain a written permission from that other author and his/her publisher. The font face to be used in the figure or graph should be the one generally available in each word processor and operational system such as Symbol, Arial and Arial with the font size not less than 9 point.

III. Mathematical Equation

The mathematical equation should be positioned symmetrically on the column, marked by sequential numbers written on the right corner within brackets. If the writing of equation takes more than one line, numbers should be written on the last line. Letters used as mathematical symbols in the text should be written in italics such as y. Equations in the text should be referred to as abbreviations, for example Eq.(1) or Eq.(2).

$$Q(x,a) = \frac{\sum_{i=1}^{N} \alpha(x) \times q(S_i, a_i)}{\sum_{i=1}^{N} \alpha_i(x)}$$

(one single space, 10 pt)

Equation (1) is obtained using a Style format as the following: Variable: Arials Italic and LC Greek: Symbol Italic. Format size: Full 10 pt, Subscript/Superscript 8 pt, Subsubscript/Sub-superscript 6 pt, Symbol 11 pt and Sub-symbol 9 pt. For best format of equation please use MathType.

B. Citations

Citations in the text should be written using Arabic numbers and put in order in accordance to what they refer to in the text. Numbers should be written in square brackets such as ”... Carreras et al. [1] ....” Citations should be written one space away from the words after commas or periods and before colons (:), semicolons (;), and question marks (?). If located at the end of a sentence, citations should be put before periods such as ”.... by several researchers [2-3].” All

citations should then be written in the right order in the list of references at the end of the text, with the writing procedure as illustrated in the example.

IV. References

References should be written following the order they appear in the text, using Arabic numbers in square brackets, as seen in the example. References should consist of initials and writers’ names, names of journals or titles of books, volumes, editors (if any), publishers and their cities, years of publication, and pages. All writers’ names have to be mentioned. Use the abbreviation ”Anon” if writers are anonymous. Names of journals should be written using the commonly-used abbreviations. **For best format, please use reference tools such as Mendeley**.
