

Name: _____

Please read [Top-10 Myths about Sustainability](#) and consider the following questions:

1. Please rank-order these 10 myths from least-important to most-important (in your opinion) and explain your reasoning. (~1 page).
2. Can you add one or more 'myths' that are missing from this Top-10 list? Afterall, 10 is arbitrary number here. Explain and discuss. (~1 page).
3. Find (and annotate as needed) an illustration that for you best illustrates what sustainability is. Or, alternatively, draw your own original illustration. Include this illustration as Figure 1 of your report on a separate page.

Please turn this into a professional printed 4-page report (Page 1 = cover page) by Wednesday 2/24 at the start of class.

Make sure that you include page numbers and the figure number, figure caption, and figure source with your figure.
