

Here is a list of my personal fetish!  
I'm certainly forgetting many things, so will update often!

I very often say that my 3 main things are: Feral - Rule34 - Non-Consensual  
Though I of course can like ideas that respect none of these rules, and not like ideas that respect all of these rules! So I'll give more insight to what I like in general.

## Short List

### What I like and can draw :

Feral

Rule34

Bondage/Rape/Non-consensual

Birds, dogs, felines, rodents, equines, dragons are what I draw the most, but any animal is

Ok, unusual animals are very welcome

Anatomically correct

Anthro are globally okay

### What I won't draw :

Humans

Vore

Gore

Scat/Watersports

Herms

Human-like penis

## Long List

### Type of Character

#### Feral

I like pretty much every feral species

Most favorites: **Birds**, **Horses** (especially drafts)

Canines: mostly like **short-haired** strong dogs (canines are also the easiest species for me to draw, so it's a plus)

Dragons: buffed dragons, big love for **drakes** and **wyverns**.

Love to work on **unusual species**, some examples:

- Bull/Cow
- Elephant/Mammoth
- Rhino
- Crocodile
- Dolphin/Orca

- Sea lion/Seal
- Kangaroo
- Bat

Only exception: **insects**, **non-mammal fishes**, **Taurs**

## Anthro

Much more restrained on anthro, I like a few body types:

**Curvy females with good breast size**, prefer **soft skins** (scalies, sharks,...) [X](#)

Buffed, beast type males. [X](#)

**Anthro birds**, often with stylized talon legs. [X](#)

Some **toony**, Zootopia-like body types can be okay.

I don't like much **anthro butts**

Kobolds, gnolls, rats are excellent for capture scenarios of a bigger species.

## Colors

I highly prefer **natural colors**.

The **flashier** it is, the worse it is.

**Fluo genitals** are not my thing, but can do alts for extra.

## Anatomy

I highly prefer **anatomical correctness** (including respect of genitals and sizes).

I usually draw "realistically big".

Prefer feral dragons without balls and breasts.

I don't like **humanoid penis**

## My Kinks (Consensual Section)

For consensual, I rather like **simple** stuff!

**Vanilla**

**Showing off close-up** [X](#) (works very well with several characters **lining up** too [X](#))

**Frotting**

**Hands** (rubbing, fapping, grabbing...)

**Cute expressions**

**Before sex**

**Size difference** (not too big, I prefer smaller dom)

**Interspecies**

**Breastfeeding** is cute ^v^

I also like when it has **Energy** (Fighting, flying, swimming...)

Having some **context/dialogue/story** is also a plus

Less favorable to (but not impossible)

After sex

Gaping

Cum abundance

Oral sex

Cubs (I prefer fully grown out but it's not a no-no)

Hyper (Not for me but fun to draw)

Consensual bondage

Feral x Anthro (Better if anthro tops feral)

## My Kinks (Non-Consensual Section)

I really like **KINKY CAPTURES** and everything that goes with it! The aspect I love with it is "Exploiting Sex as a Weakness". Here are a bunch of things going with it!

- **SURPRISE**: The captors directly go for the tender sensitive parts: penis, balls, vagina, ass, cloaca, nipples... giving a huge advantage. Can be part of a **Trap**. [X](#) [X](#) [X](#)
- **Coitus interruptus**: Additional kink points if it's done while the character is mating/fapping. The happier the character is, the worse the fall is! [X](#)
- **Kinky fight**: Trying to fight back with a sexual aspect to it, for sure a disadvantage!
- **Erratic Bondage**: many ropes spread across the body is more realistic and exciting to me than a well dressed/shibari-like bondage! [X](#) [X](#)
- **After capture**: possibly with bruises, erratic bondage. Can show the captors victorious. [X](#) [X](#)
- **Bondage in movement**: the captured character being bonded and moved from one place to another. can be by walking, on a mount (or be the mount), in a vehicle (cart, truck, etc..) [X](#) [X](#)
- **Smaller dom/big sub**: Even more embarrassing!

I like **ballbusting** but only in this context. An efficient way to get a male down! [X](#)

**Bondage** (anything from light to hard, but not **latex**)

**Forced frotting** [X](#)

**Forced mating/breeding** [X](#)

**Teasing**

**Toys**

**Orgasm control** [X](#)

**Put on display** [X](#)

**Hands**

**Cameras/filming**

I like less:

**Laboratory setting** (Cold and complicated to draw)

**Facefucking**

**Facesitting**

## No-No List

**Tickling, Hypnotism/Mind Control, Scat, Watersports, Herms, Torture...**

List would be long but there are too many weird fetishes around \o/

## Complexity

Drawing takes a lot of time, so I wouldn't want to spend time on ideas I don't like too much. For example it's hard for me to accept a complex bondage/multi characters pic if I don't like the characters too much. While I could be okay to do a simple solo pic of the same character.

## Favorite Characters

I find every pic/story more interesting if I know the character, and if this character has a **background/story**. Hence my love for **Rule34**. If I like the character and his story, I'll be more willing to draw them.

I really enjoy when the pic respects the **canon** of the story. I'll very much enjoy drawing Rule34 that makes sense, even if I don't feel much for the characters individually (for example, a simple Simba x Nala pic)

**Crossovers** fully remove this attract. Really not fond of them.

Non exhaustive list of characters I like (if you want to find ideas):
