

ART NEWSLETTER

With Miss O'Rourke

December

This December, we will romanticize the winter through our art! The elements of art and principles of design we will learn about are Shape and Pattern.

4th grade: Nature shows off its design skills in so many ways, especially through the formation of snowflakes. We will design our own unique snowflakes using shape and pattern.

3rd grade: We will be designing our own winter garments such as mittens, hats, and sweaters using patterns, and even weaving!

2nd grade: Incorporating science lessons about hibernation, we will be creating our own sleeping creatures! Sleeping in the finest of patterned comforters, of course.

1st grade: We will be creating our own gingerbread houses! (non edible unfortunately) Our houses will be a grand design of symmetry and pattern!

Kindergarten: We will be using basic shapes to create snowmen, trees, and cozy cups of hot chocolate!
