

The following directions will assist you in checking and/or possibly updating the version of Google Chrome currently being used on a Chromebook.

Step One: Log into the Chromebook and open the Google Chrome browser. Locate the three dots in the top right corner of the window and click them. Scroll down and select **settings**.

Step Two: Once you have accessed the settings screen of your Chromebook locate **About Chrome** in the list of options on the left side of the window and select.

Step Three: Selecting **About Chrome** will display what version of Chrome is currently installed on the Chromebook. If the version is not at least 91.0 it is not up to date for testing. Click **Check For Updates** in order to update your Chromebook to at least version 91.0. You will have to restart your Chromebook once the update is complete.
