

Getting Started with Quill

Matt Schaefer: VR Product Designer & Creator

[Last updated H2 2022](#)

Quill will turn you into a super powered force of creativity! Assuming you have your headset setup, and Quill installed, here's how to get started...

Levels

Beginner:

The best way to start is to go thru Goro's intro course. It's about an 1 hr but condenses an 8hr session he gives at paid workshops.

Intermediate:

Then I suggest going thru Nick Ladd's Animbrush Academy tutorials. There you can pick and choose what you want to learn next. They range from beginner to intermediate. All bite sized so they're easy to digest.

Advanced and Beyond:

The final stage is diving into the insane knowledge shared on the Virtual Animation YouTube channel. It's def advanced techniques for experienced users but it's full of priceless info.

Learning Setup:

The best way to follow along with tutorials in VR is to use Oculus Dash to open a floating desktop window, in Quill, and pin it in place.

Share your #quillustrations

Most of the action is on the Virtual Animation and Virtual Painting FB groups. There's also a thriving community on the Virtual Animation Discord server.

Common hashtags:

#quillustration #quillvr #vranimation #vrpainting #vrnarrative #viewinvr #madeinvr

Additional Resources:

The Quill website is the best resource for the top tutorials, latest updates, and even has a forum for troubleshooting and suggestions.
