

Import GMail Contacts

Import contacts from your GMail address book into your Pipedrive CRM account.

Get your free copy of [Import GMail Contacts\[extern\]](#) to your Google Drive.

With this Ultradox app you can import contacts from a selected contact group into Pipedrive. You can assign the imported contacts to an existing organization.

Run

`icon:icon-run` Open the Ultradox file **Import GMail Contacts** and click on the **Run** button in the menu bar of the automation.

You can also publish the automation as an app so that you can easily share it with your colleagues.

That's it! You have successfully imported your contacts.
