ABSTRACT

Text for abstract. Type your abstract **Font Calibri** here (10pt). An abstract (minimum 150 word, maximum 200 words) is typed single space. The abstract should be written briefly and factually in English, and be written separately from the article. The abstract contains a clear elaboration of (1) background or research purpose, (2) methods, (3) results, and (4) conclusion.

Keywords: Example: Android, Disruption Era, Instructional Media (3-5 words or phrases)

INTRODUCTION

The introduction contains the purpose of article/research that is formulated and presented by an adequate introduction and avoids detail references and research result presentations. The research urgency, supporting facts, and data must be included. A preliminary research result should be explained as the basis of the research. Before mentioning the objective/s, a gap analysis must be elucidated. The gap analysis states the difference/s between the research and other previous studies. At this point, the novelty will be apparent. The research stance must be included, whether it corrects, debates, or support the previous research

Theoretical Framework

In the process of writing a thesis, the supervisor is a person with the knowledge, research

METHODS

The method used should be accompanied by references, the relevant modification should be explained.

This should give detailed and sufficient information of materials and procedures used to allow experiments to be reproduced. Previously published procedures and sources of laboratory procedures should be cited. Information on the equipment model, manufacturer's name and address including the city, province/state and country should be provided. The procedures should be written in past tense and should consist of paragraphs with individual methods

Sub Section 1

The procedure and data analysis technique should be emphasized in a literature review article. The stages and analysis of the research must be explained in detail

Sub Section 2

Explaining research chronological, including research design, research procedure, how to test and data acquisition, ect. The description of the course of research should be supported references, so the explanation can be accepted scientifically.

RESULTS AND DISCUSSION

Results

The results and discussion should be presented in the same part, clearly and briefly. The discussion part should contain the benefit of the research result, not the repeat result part. The results and discussion part can be written in the same part to avoid the extensive quotation. Tables or graphs must present different results.

Discussion

The results of data analysis must be reliable in answering research problems. References to the discussion should not repeat the references in the introduction. Comparisons to the findings of previous studies must be included.

In tables font size 9 must be used and vertical lines must be not be drawn. When the contents of the table cannot fit into the table, font size 9 might be used. Number of the table and the title must be written above the table.

Table 3. For Example

No.	Criteria	Target (%)
1	Criteria 1	≥85
2	Criteria 2	≥85
3	Criteria 3	≥85

Figure 1. For Example

CONCLUSION

The **conclusion** of the research is presented briefly, narrative, non-bulleted, and conceptual. The research impact must be stated. Provide a statement that what is expected, as stated in the "Introduction" chapter can ultimately result in "Results and Discussion" chapter, so there is compatibility.

Moreover, it can also be added the prospect of the development of research results and application prospects of further studies into the next (**recommendations**).

CONFLICT OF INTEREST

A conflict of interest statement must also be included in the manuscript before the "Acknowledgements" sections and should summarize all aspects of any conflicts of interest.

ACKNOWLEDGEMENTS (OPTIONAL)

Substantive contributions of individuals should be noted in an Acknowledgements section and entered after the "Conflict of Interest".

REFERENCES

Citation should be written in reference part using reference manager (Mendeley or Zotero). Every cited reference should be written completely in the reference part. An unpublished reference is not suggested to be cited in the article. References should be written according to the **APA style**. This journal requires >80% of the reference cited from the national and international journals (not more than 5 years). The number of references used is at least 20.
