

Proposed Presentation Title

The NFV MANO : Seamless upgrade and maintenance with Fenix-Tacker plugin

Abstract

This presentation introduces the OpenStack Fenix Project and the OpenStack Tacker project and introduces plugins for rolling infrastructure maintenance/upgrade of VNF and Host. Using these plugins, VNF can have zero impact and even make its own rolling upgrade at the same. We also show the demonstration of Tacker-Fenix Plugin using VNF migration/Scaling.

Social Summary (100 chars)

Using Tacker and Fenix projects to make rolling VNF/host upgrade and maintenance.

What should attendees expect to learn? (1000 chars)

The attendee will get the information of Tacker and Fenix project.

In addition, the attendee can see the demonstration of Fenix-Tacker plugins for VNF/Host Maintenance.
