Improving searches

Choosing the correct keywords and utilising advanced search operators can significantly improve the quality of the results you get from a search engine. Complete the table below to see if you can use a search engine effectively.

What you need to find	Website that will appear somewhere near top of your search list if you are successful	What you searched for	Number of results	Advanced search operators used (put a mark next to the operators you included in your search)		Why you used them
Information about two famous computer scientists: Alan Turing and Charles Babbage. However, you are only allowed to use the keywords				OR		
				NOT (-)		
				Phrase (" ")		

Raspberry Pi

Turing and Babbage. You can use any operators you want.						
Green garden shade netting, you can only use two keywords (and any operators you want).				OR		
				NOT (-)		
				Phrase (“ ”)		
Restaurants called the Taj Mahal in the USA, but not in New York.				OR		
				NOT (-)		
				Phrase (“ ”)
