ROBERT M. ROGERS, M.D., P.A.

— Dermatology and Dermatologic Surgery

Dermatologic Care Greenville SC

Pathology Processing and Prognosis

Pores and skin specimens will likely be despatched to Inform Diagnostics (formerly Miraca Life Sciences) for pathology processing and diagnosis. They are going to send you a separate bill for their services. Please contact Inform Diagnostics Billing at 800-344-1160 with any pathology billing questions.

In case your insurance coverage firm requires that we use other labs, these labs will file your insurance coverage directly. You may be responsible for your deductible and co-insurance.

ACNE

Zits (acne vulgaris) is a very common pores and skin situation, particularly among teenagers and younger adults. Acne is characterised by pimples and/or blackheads, in addition to redness and [Best Dermatologist in Greenville SC](#) tenderness of the skin. This happens when hair follicles turn out to be clogged with oil and lifeless skin cells. Zits sometimes affects the pores and skin of the face, back, and higher chest.

Almost everybody will suffer from acne sooner or later of their lives, especially during puberty, when hormonal changes stimulate sebaceous oil glands which might be attached to hair follicles. Pimples may have an effect on children before puberty and adults after puberty. Genetics are the most important factor within the severity of pimples, but acne could be worsened by different factors, including certain drugs, cosmetics, and exposure to bacteria.

For gentle pimples, a light cleanser and moisturizer will usually help it to clear up on its own. It is also crucial to by no means pop or decide at pimples or blackheads, which may trigger the acne to worsen and last more and might even result in scarring. For moderate to severe acne, over-the-counter or prescription medicines may be necessary. Pimples will be treated with anti-inflammatory drugs, antibiotics, or topical antiseptics.

For those who or your youngster is affected by zits, schedule an appointment with us today.

SKIN CANCER

Skin cancer is an abnormal progress of pores and skin cells that typically develops on areas which might be exposed to the sun. There are a number of several types of pores and skin cancer. The most typical are basal cell carcinoma, squamous cell carcinoma and melanoma.

Basal cell carcinoma usually appears as a waxy or shiny raised space of the skin. Squamous cell carcinoma can seem as a crimson nodule or flattened, scaly lesion on the skin. Melanoma can take many types and may develop anywhere on your body. Present moles which have modified in colour or size, or that bleed, might have grow to be cancerous. In case you have any abnormalities on your skin, make an appointment with a dermatologist as soon as possible.

To reduce your danger of pores and skin cancer, limit your exposure to the sun, use a high SPF sunscreen, and wear hats, sun shades and long sleeves and pants if you are outdoors. Check your skin often for any changes and visit a dermatologist when you notice anything unusual in your skin. Early detection of skin most cancers increases the probabilities of profitable treatment. In the event you suspect that you'll have pores and skin most cancers, make an appointment with us today.

PSORIASIS

Psoriasis is a persistent skin situation characterized by purple patches of dry, scaly pores and skin that could be itchy and even painful. Psoriasis hurries up the life cycle of skin cells, which causes the excess cells to construct up on the skin, forming scales. There are a number of various kinds of psoriasis, together with plaque psoriasis, nail psoriasis, guttate psoriasis and inverse psoriasis. Most types of psoriasis come and go in cycles, flaring up for a number of weeks or months and then subsiding for an prolonged time or going into remission.

There is no treatment for psoriasis, however the symptoms may be managed. Moisturizing, not smoking, and limiting stress can help with signs of psoriasis. Topical treatments, gentle therapy and prescription medicines can even alleviate symptoms. Psoriasis flare-ups can typically be triggered by infections, skin accidents, heavy consumption of alcohol, certain medicines, and vitamin D deficiencies. Figuring out and eliminating these components may help cut back psoriasis outbreaks.

If you're affected by psoriasis, we can help. We will decide the appropriate therapy plan for you relying on the kind of psoriasis, the severity of your signs, and your medical history. If in case you have any questions on psoriasis remedies, please call our workplace for extra information.
