

Super Cats Online Slot

Feel the feline fury with the Super Cats slot today and see how powerful these creatures truly are. Find the Scatters they've hidden for up to 25 Bonus Free Spins, while five Power Spins can pounce at any time! Just be sure to keep feeding these Super Cats so they don't turn hungry on you.

The RTP of Super Cats come in above the industry average of 96% because it sits at 97.03%. This is a great RTP that could give you the chance of getting a good return on any money you plan on spending in the game. The variance has been set to low to medium. This means that the wins from the reels come in quite often, but they won't be for huge amounts of money.

DID YOU KNOW??? Super Cats Gameplay?

Before starting Super Cats there are certain things you can do to set it up under your preferences. You can see the betting amount right below the reels. You can set it from 20 all the way up to 2000 coins per spin. However, the player can't control the coin size in this tile. The slot has 20 paylines that can be controlled by the player. The number of lines is shown on the left side, right below the reels. Players can choose how many paylines will be active and they can pick between two options. The gameplay can be set on 10 or on 20 active paylines. The betting amount will depend on how many paylines are active. Keep in mind that this slot can be played with bitcoin. However, you can play with regular FIAT currency as well. Hitting the button with the two rotating arrows will start the Super Cats online slot. The button is on the bottom right side, right below the reels. Right next to it, you can see the Auto Play button which is used to spin the reels automatically. This is a feature often added to slots by game developers. Additionally, this slot title has a Max Bet button as well. Clicking on it allows the players to play the game at the maximum bet. The button to control the background sound is on the top-right side of the reels. Right next to it, there is an "?" button. Clicking on it will reveal the gameplay, paylines, and all the bonuses. Lastly, the game options are there as well. Players can find the settings button right below the sounds button. [슬롯](#)

Super Cats Bonus Features

Wild Symbol - The wild symbol can substitute in for all other symbols in the game apart from the bonus symbol. This can help you form better wins.

Bonus Spins - The free spins round is referred to as bonus spins in Super cats. Getting three, four or five of the bonus symbols on the reels wins you 10, 15 or 25 free spins respectively. In the free spins round all wild symbols that land on the reels become sticky. This means they stay in place until the end of the round, increasing your chances of winning.

Powerspins - Randomly throughout the game you can win five powerspins. During these powerspins all wild symbols become sticky until the end of the round. For every wild symbol that

lands on the reels, a second wild will then be added randomly on to the reels. They will go on to the second, third or fourth positions where no wild has been placed before. All of these wild symbols can help you boost your winnings, and powerspins are free to play.

Trivia

The Super Cats slots game is one that can be enjoyed by cat lovers and other players alike. As a matter of fact, the story is also connected to Mayan culture. For everyone that loves a slot that's simple but offers players a lot of extra features and winnings, this is the right title for you. The simplicity of the sticky wilds paves the way for some great wins. Adding in the random power reels is a piece of spontaneity that we love. The Free Spins feature is extremely lucrative even though it's not easy to trigger it. We believe that the Wild plays a major role in the game. It substitutes for all symbols but it also becomes sticky and random during the bonus spins and the powerspins. Super Cats offers a feline connection and even though the graphics will probably disappoint, the features do look fairly interesting.
