

Tables of contents

I. Table of contents	I
II. Index of Figures	VI
III. Index of Tables.....	IX
IV. Abbreviations	X
1. Introduction	1
2. Literature review	3
2.1. Psittacine proventricular dilatation (PDD)	3
2.1.1. Definition	3
2.1.2. History of psittacine proventricular dilatation	3
2.1.3. Clinical signs of PDD	4
2.1.4. Occurrence and geographical distribution of PDD	4
2.1.5. PDD in psittacine birds	4
2.1.6. PDD in non psittacine birds	5
2.1.7. Aetiology	5
2.2. Discovery of avian borna viruses (ABV).....	5
2.3. Avian borna virus (ABV)	6
2.3.1. Taxonomy	6
2.3.2. Virion morphology and physical characteristics	8
2.3.3. ABV genome	8
2.3.4. ABV proteins	9
2.3.4.1. ABV nucleoprotein (N)	9
2.3.4.2. ABV phosphoprotein (P)	9
2.3.4.3. ABV- X Protein (X)	10
2.3.4.4. ABV matrix protein (M)	11
2.3.4.5. ABV glycoprotein (G)	11
2.3.4.6. ABV RNA-dependent RNA polymerase (L)	11
2.4. Infection cycle of ABV	12
2.5. Cultivation of ABV	13
2.6. Natural ABV infection in psittacines	14
2.7. Natural ABV infection in non psittacines	15
2.8. Experimental ABV infection in psittacines	16
2.9. Epidemiology of ABV	17
2.10. Pathogenesis	17
2.11. Comparison of ABV and BoDV-tropism	19
2.12. Routes of ABV transmission	20
2.12.1. Horizontal route of transmission	20
2.12.2. Vertical route of transmission	20
2.13. Diagnosis	21
2.13.1. Intra vitam diagnosis	21
2.13.2. Post mortem diagnosis	21
2.14. Differential diagnoses	22
2.15. Prevention and control	22
2.15.1. Vaccination	22
2.15.2. Therapeutics	23
3. Materials and Methods	24
3.1. Animals	24
3.2. Experimental infection of cockatiels with ABV-2	24
3.3. Experimental infection of cockatiels with ABV-4	24
3.4. Animals housing	25
3.5. Virus preparation and isolation	25
3.6. Inoculation of the virus	26
3.7. Clinical examination	26
3.8. Euthanization	26

3.9. Organ sampling	28
3.10. Re-isolation of ABV-2 and ABV-4	28
3.11. Histological examination of tissue sections	29
3.11.1. Fixation of tissue sections of ABV infected cockatiels	29
3.11.2. Preparation of formalin-fixed tissue sections	29
3.12. Evaluation of inflammatory lesions	29
3.13. Immunohistochemistry (IHC)	31
3.13.1. BoDV-antibody	31
3.13.2. Secondary antibody	31
3.13.3. Block serum	31
3.13.4. Control	31
3.13.5. Evaluation the positive signals	31
3.13.6. IHC protocol	31
3.14. Evaluation of ABV distribution pattern	32
3.15. Characterization of the immune cells	33
3.15.1. Preparation of tissue sections	33
3.15.2. Controls	33
3.15.3. Primary antibodies, secondary antibodies, and blocking procedures	33
3.15.4. Antigen retrieval	34
3.15.5. IHC protocol for characterization of the immune cells in cockatiels after ABV-2 and ABV-4 infection	37
3.16. Generating the ABV-2 and ABV-4 RNA specific probes for the ISH	38
3.16.1. Generating the ABV-2 specific oligonucleotide probes	38
3.16.1.1. Visualization of PCR products by gel electrophoresis	41
3.16.1.2. Purification of DNA	41
3.16.1.3. Ligation of PCR products into PCR TOPO 4 TA® Vector	42
3.16.1.4. Polymerase chain Reaction (PCR)	42
3.16.1.5. Purification of PCR products	43
3.16.1.6. In vitro transcription	43
3.16.1.7. In vitro transcription protocol	44
3.16.2. Generation of ABV-4 specific riboprobes	45
3.16.2.1. Sequencing of the DNA plasmid carrying an ABV-4 N segment	45
3.16.2.2. Amplification of the plasmid DNA carrying the ABV-4 N segment by PCR.....	47
3.16.2.3. Visualization of PCR products by gel electrophoresis	48
3.16.2.4. Purification of DNA	48
3.16.2.5. In vitro transcription	48
3.16.2.6. In vitro transcription protocol	49
3.17. Determination of digoxigenin labeling of the probes	49
3.18. In situ hybridization (ISH)	50
3.18.1. Controls	50
3.18.2. Evaluation the positive signals for ISH probes	50
3.18.3. DIG-labeled riboprobes	50
3.18.4. Preparation of paraffinized tissue sections	51
3.18.5 Evaluation of ABV-2 and ABV-4 RNA distribution pattern	51
3.18.6. ISH protocol	51
3.19. Cultivation of cockatiel blood cells	53
3.19.1. Collection of blood samples	53
3.19.2. Isolation of buffy coat (BC) cells from healthy cockatiels	53
3.19.2.1. Protocol of isolation of BC cells from whole blood	53
3.19.3. Isolation of mononuclear cells (MNC) from healthy chicken	54
3.19.3.1. Protocol of separation of chicken MNC	54
3.20. Characterization of the immune cells in BC cells of cockatiel	54
3.20.1. Characterization of cockatiels immune cells by (IIF)	55
3.20.1.1. Preparation and fixation of BC cells	55

3.20.1.2. Blocking	55
3.20.1.3. Control	55
3.20.1.4. Evaluation of the positive signals	55
3.20.1.5. Primary and secondary antibodies	55
3.20.1.6. General protocol for detection of CD3, CD4, CD8a, B cells, monocytes, and thrombocytes	57
3.20.2. Characterization of the cockatiel immune cells in BC by flow cytometry (FC)	58
3.20.2.1. Preparation of cells	58
3.20.2.2. Blocking	58
3.20.2.3. Washing	59
3.20.2.4. Primary antibodies	59
3.20.2.5. Secondary antibodies	59
3.20.2.6. Controls	59
3.20.2.7. Flow cytometry protocol	60
3.21. Experimental infection of BC cells with ABV-4 one day post isolation	60
3.21.1. Preparation of BC cells	60
3.21.2. Infection with ABV-4	60
3.22. Demonstration of ABV antigen in BC cells by IIF	61
3.22.1. Preparation of BC cells	61
3.22.2. Fixation	61
3.22.3. Blocking	61
3.22.4. Primary antibody	61
3.22.5. Secondary antibody	62
3.22.6. Controls	62
3.22.7. IIF protocol for demonstration of ABV antigen	62
3.23. Demonstration of ABV-4 RNA in BC cells	63
3.23.1. RNA extraction from BC cells	63
3.23.2. RNA extraction from ABV-4 suspension	63
3.24. Reverse transcription reaction (RT)	63
3.25. PCR for amplification of the ABV-4 RNA	64
3.26. Demonstration of house keeping gene	65
3.27. Stimulation of BC cells with PHA-M mitogen	66
3.27.1 Preparation of PHA-M mitogen	66
3.27.2 Stimulation of cockatiels BC cells in vitro	66
3.28. Assessment of proliferating	66
3.28.1. Trypan blue assay	66
3.28.2. Detection of the Bromodeoxyuridine (BrdU) incorporation by IIF	67
3.28.2.1. Preparation of BrdU	67
3.28.2.2. Preparation of BC cells	67
3.28.2.3. Blocking	67
3.28.2.4. Primary antibody	67
3.28.2.5. Secondary antibody	67
3.28.2.6. DAPI staining	67
3.28.2.7. Control	67
3.28.2.8. Assessment the positive signals	67
3.28.2.9. Indirect immunofluorescence for detection of BrdU	68
3.29. Experimental infection of stimulated BC cells at the same day of isolation	68
3.29.1. Demonstration of BrdU in stimulated BC cells	68
3.29.2. Demonstration of ABV antigen in stimulated BC cells	69
3.29.3. Demonstration of ABV-4 RNA in stimulated BC cells	69
3.30. Experimental infection of stimulated BC cells at day 3 post stimulation	69
3.31. Description of the statistical analysis of the data	72
4. Results	73
4.1. Clinical signs	73

4.1.1. Clinical signs after ABV-2 infection	73
4.1.2. Clinical signs after ABV-4 infection	74
4.1.3. Comparison of the clinical observation	74
4.2. Gross lesions	74
4.2.1. Gross lesions after ABV-2 infection	74
4.2.2. Gross lesions after ABV-4 infection	74
4.2.3. Comparison of gross lesions	75
4.3. Histological findings	76
4.3.1. Histological lesions after ABV-2 infection	76
4.3.2. Histological lesions after ABV-4 infection	78
4.3.3. Comparison of histological lesions after ABV-2 and ABV-4 infection	81
4.4. Characterization of the infiltrating immune cells after ABV infection	88
4.5. Demonstration of ABV antigen	90
4.5.1. Distribution pattern of ABV antigen after ABV-2 infection	90
4.5.2. Distribution pattern of ABV antigen after ABV-4 infection	92
4.5.3. Comparison of ABV antigen distribution after ABV-2 and ABV-4 infection	95
4.6. Generation of ABV-2 specific probes for the ISH	101
4.6.1. Amplification of the oligonucleotides of ABV-2 N region fragments	101
4.6.2. Amplification of ligated DNA	101
4.7. Generation of ABV-4 specific probes for the ISH	102
4.7.1. Amplification of the cloned ABV-4-N-DNA	102
4.8. Determination of labelling of ABV-2 and ABV-4 specific probes	103
4.9. Demonstration of ABV RNA	104
4.9.1. Distribution pattern of the ABV-2 RNA after ABV-2 infection	104
4.9.2. Distribution pattern of the ABV-4 RNA after ABV-4 infection	107
4.9.3. Comparison of ABV RNA distribution after ABV-2 and ABV-4 infection	111
4.10. General comparison between ABV-2 and ABV-4 infection	118
4.11. Relationship between inflammatory lesions and viral antigen detection	119
4.12. Comparison of histological findings, gross lesions, ABV antigen and ABV-2 RNA after ABV-2 infection	121
4.13. Comparison of histological findings, gross lesions, ABV antigen and ABV-4 RNA after ABV-4 infection	121
4.14. Isolation and characterization of cockatiel blood cells	122
4.14.1. Isolation of cockatiel blood cells	122
4.14.2. Characterization of immune cells in cockatiel BC by IIF	123
4.14.3. Characterization of immune cells in cockatiel BC by flow cytometry	125
4.15. Experimental infection of BC cells with ABV-4 and demonstration of ABV antigen and ABV-4 RNA at early time point (3 and 5 dpi)	128
4.15.1. Demonstration of ABV antigen in BC cells	128
4.15.2. Demonstration of ABV-4 RNA in BC cells	128
4.16. Experimental infection of BC cells with ABV-4 and demonstration of ABV antigen and ABV-4 RNA at early time point (9 and 15 dpi)	129
4.16.1. Demonstration of ABV antigen in BC cells	129
4.16.2. Demonstration of ABV-4 RNA in BC cells	130
4.17. Experimental infection of BC cells after stimulation with PHA-M mitogen	130
4.17.1. Stimulation of BC cells with PHA-M	130
4.17.2. Experimental infection of stimulated BC cells at day 1 post isolation	134
4.17.2.1. Demonstration of BrdU incorporation from 0 – 5 dpi and stimulation	134
4.17.2.2. Demonstration of ABV antigen from 0 – 5 days post infection, and stimulation	134

4.17.2.3. Demonstration of ABV-4 RNA from 0 – 5 days post infection, and stimulation	134
4.17.3. Experimental infection of stimulated BC cells at day 3 post stimulation	136
4.17.3.1. Demonstration of BrdU incorporation from 4 – 14 days post stimulation	136
4.17.3.2. Demonstration of ABV-4 RNA from 4 – 14 days post stimulation	137
5. Discussion	139
5.1. Comparison of the clinical observations	140
5.2. Comparison of gross lesions	140
5.3. Histological findings	140
5.3.1. Histological findings after ABV-2 infection	141
5.3.2. Histological lesions after ABV-4 infection	142
5.3.3. Comparison of histological lesions after ABV-2 and ABV-4 infection	143
5.4. Characterization of the infiltrating immune cells after ABV infection	144
5.5. Distribution patterns of ABV antigen	145
5.5.1. Distribution pattern of ABV antigen after ABV-2 infection	145
5.5.2. Distribution pattern of ABV antigen after ABV-4 infection	147
5.5.3. Comparison of ABV antigen distribution after ABV-2 and ABV-4 infection	148
5.6. Demonstration of ABV RNA	149
5.6.1. Distribution pattern of ABV-2 RNA after ABV-2 infection	150
5.6.2. Distribution pattern of the ABV-4 RNA after ABV-4 infection	151
5.6.3. Comparison of ABV RNA distribution after ABV-2 and ABV-4 infection	153
5.7. Comparison of histological findings, detection of ABV antigen and ABV RNA and clinical observation	155
5.8. Isolation of cockatiels blood cells	156
5.9. Characterization of the immune cells in cockatiel BC cells by IIF	157
5.10. Characterization of the immune cells in cockatiel BC cells by FC	158
5.11. ABV-4 infection of cockatiel BC cells	159
5.11.1. ABV antigen and ABV-4 RNA in cockatiel BC cells	159
5.12. ABV-4 infection of stimulated BC cells	160
5.12.1. Stimulation of BC cells with PHA-M mitogen	160
5.12.2. Assessment of the proliferative state in cockatiel BC cells	161
5.12.3. ABV antigen and ABV-4 RNA in stimulated BC cells	161
6. Summary.....	163
7. Zusammenfassung	164
8. References	165
9. Annexes	184
