

Human Motivators

What is painful about your personal Current State?

Money

I am 24 years old with a good paying job for my age. I still have to work for someone else making them way more money than I get. I want to make my own money and lots of it. With a normal wage I have to live in a cheap apartment. I have to do the renovations myself. I can't flex on other people because I don't earn enough. I have to check my bank balance before making purchases.

Body

I am not proud when I look into the mirror. I can't wear the clothes I want because my body does not have an ideal shape. I used to be in very good shape and I miss that feeling. Pull ups & push are also harder then before. When I am at the beach I cant remove my shirt and feel proud.

Status

I am not that high status because of my body & money. I want to be able to have high status and respect. Because of low status people respect my opinion less and will do less things for me.

What is desirable about your personal Dream State?

Money

I want to make my own money (and lots of it). I want to be able to buy whatever I want without checking the bank. I want to be able to pick up the bill when going out without a problem. I want to live in a big mansion. Going first class or private jet to any place that I want and making money from across the globe.

Body

I want feel my six pack underneath my shirt. When I take of my clothes I want to feel proud about my body and know that girls like it. I want to wear clothes and have them fit nicely because I have a nice body. I want to be able to do physical feats that are impossible for normal people.

Status

Being high status will guys respect me & make girls attracted to me. When I speak everyone will listen and agree. Being high status means that I can confidently be me and people will still respect me.
