HISTORY

Anakin was born at the Nespis VIII space station. The youngest son of Leia Organa and Han Solo, he was named after his grandfather, Jedi knight Anakin Skywalker, as a last minute decision made by his mother shortly after giving birth to him, when she decided that her youngest would be named after Anakin because she wanted to redeem her father's name, and she also thought she could overcome her fear of Darth Vader by seeing, through her son, what her father could have been. Anakin grew up to resemble his namesake in a lot of ways. He had Anakin's hair and eyes, along with Anakin Skywalker's passion for mechanics and proneness to make quick decisions and jump head first into danger if it meant not putting anyone else in danger. From a young age, Anakin enjoyed puzzles and fixing things, to the point he became able to fix anything no matter if he knew how it worked or what it was.

Anakin was born during a time of great instability. The New Republic was faced with the resurgent Imperial factions under the reborn Dark Lord of the Sith and Galactic Emperor Darth Sidious. On one occasion, Sidious touched Anakin while he was still in the womb, telling Leia that he would one day inhabit her unborn child's body, but Luke and Leia managed to stop him from achieving his goal. On another occasion, he attempted to take over the body of the child when Anakin had just been born, in an effort to sustain his spirit in a more powerful form. However, Sidious was killed, shot by Anakin's father, Han, before he could complete his plan. Though this happened, the dark essence of the Sith Lord went in the direction of Anakin while Leia attempted to shield the baby with her body. However, the Jedi Knight Empatojayos Brand protected Anakin and gave his life so that the child could continue his.

Anakin spent the first year of his life on Anoth, an isolated planet which his uncle, Luke Skywalker, and the admiral of the New Republic, Gial Ackbar, had fortified to protect the Solo children. There, Anakin was tended to by nanny droids and his mother's best friend, Winter. His parents were allowed to visit every few months. His siblings had also lived there, until they reached the age of two and moved with Han and Leia.

Just six months after he was born, an Imperial strike team led by Furgan, the ambassador of the planet Carida, invaded Anoth trying to kidnap Anakin. Winter was able to kill most of the invaders by triggering the base's defenses and fighting the Imperials on her own. Eventually, Leia and Ackbar, who had been alerted of Furgan's plan, arrived and saved Anakin from the Ambassador's efforts. After the abduction attempt, Anakin went to live with his family.

From the moment he found out who his grandfather was, along with having been touched by a Sith Lord when he was just in the womb, Anakin grew up afraid of falling to the dark side and becoming like Darth Vader.

When Anakin was a child he had recurring dreams of his grandfather Darth Vader. Because Anakin would not confide in Leia, she sent Han to talk to him. Anakin then asked his father what happened to Luke's hand. In order to get rid of Anakin's nightmares of Darth Vader and explain the story of Luke's mechanical hand, Han told Anakin about their adventures during the Galactic Civil War. However, instead of putting Luke in the story he used Luke's hand. When Han finished the story Anakin claimed that he was going to be Luke's hand one day and then went to sleep pitting his hands against his feet.

VERSES

Perhaps The Greatest Of Them All (Legends Verse)

This verse takes place in the Legends timeline, Anakin Solo was born in the year 10.5 ABY and trained at the Jedi Praxeum on Yavin 4, alongside his older siblings Jacen and Jaina Solo, his girlfriend and best friend Tahiri Veila, and multiple other force sensitive individuals who sought to become Jedi. He is forced to grow up fast due to the Yuuzhan Vong war.

Seen Under A Different Light (Sequel Trilogy Verse)

This verse takes place in Disney's Sequel Trilogy. Anakin was born in the year 18.5 ABY and is the youngest son of Han Solo and Leia Organa, ten years younger than his older brother, Ben Solo. After the destruction of his uncle Luke Skywalker's Jedi School and the disappearance of his brother, Anakin's connection to the force became strained due to his inability to cope with the loss of half his family and the events that followed and led to his parents' separation and his father leaving his life.

HISTORY

Kaydel was born in the year 13ABY, on Dulathia. From a young age, she grew up hearing the stories of the Rebellion and, more specifically, of General Leia Organa, and grew to admire Leia for her sacrifices and her leadership. As political relations worsened between the New Republic and the First Order, the latter was opposed by Leia Organa, who founded a private military group known as the Resistance to monitor the First Order's activities. Connix ultimately joined the naval branch of the Resistance and was assigned to Fleet Command. By 34 ABY, Kaydel was serving as an operations controller under the direct command of Organa, who—in her capacity as leader of the Resistance— assumed the rank of general.

Following the Hosnian Cataclysm and the Battle of Takodana, the Resistance attacked Starkiller Base in the hope of destroying the superweapon. During the battle, Connix coordinated communications between the resistance pilots and their commanders from the Resistance base on D'Qar. After the destruction of Starkiller Base, Kaydel was promoted to the rank of lieutenant in recognition of her service as an operations controller; and was tasked with overseeing the D'Qar evacuation; prioritizing the recovery of supplies, and coordinating an organized retreat. She was still on the planet's surface when the First Order Navy invaded the system. The base was destroyed from orbit by the Dreadnought Fulminatrix, although Connix managed to escape just in time on one of the last departing shuttles. After boarding the MC85 Star Cruiser Raddus, she returned to her duties as an operations controller.

While the Resistance fleet fled from the First Order, including the First Order's flagship Supremacy, Poe Dameron enlisted Kaydel's assistance for an unauthorized mission—to help Finn and Rose Tico disable the First Order's hyperspace tracking system. Using her position on the ship's bridge, Connix ensured that their departure went unnoticed by Vice Admiral Holdo. After discovering Holdo's intention to evacuate the crew of the Raddus, Connix and several Resistance officers supported Dameron's mutiny against Holdo. With the admiral and her supporters detained at blaster point, Kaydel and Dameron seized control of the bridge. However, they were ultimately confronted by a recovered Organa. Using the stun setting on her blaster, the general shot Dameron and accepted Connix's surrender.

Despite her role in the conspiracy against Holdo, Kaydel continued to serve the Resistance and was among the survivors who took control of an abandoned Rebel Alliance outpost on Crait. The ensuing battle marked the near destruction of the Resistance. However, Connix was able to escape with Organa, Dameron, and several other survivors aboard the Millennium Falcon.

After the battle on Crait, Kaydel put the mutiny behind her. She was still trusted by Organa and retained her rank though the general was disappointed that Connix had supported Dameron's actions. However, Organa knew she had meant well, and forgave her. During her time at the Resistance Camp on the garbage planet of Anoat, Kaydel witnessed the destruction of Tah'Nuhna and informed General Organa. She also assured Organa that the General had done everything she could and it wasn't her fault, pointing at their main mission of protecting as many as they can as long as they were still alive. Later, she also informed General Jonato about a First Order armada heading towards Mon Cala where General Organa, Rey, Rose Tico, and C-3PO had gone on a mission. Jonato wanted to contact and warn Organa but Connix informed him that the First Order was also blocking communication across the system.

Sometime later, Connix helped Tico and Beaumont Kin establish a new base on Ajan Kloss.

When the Resistance heard word of Darth Sidious' return on the Sith world Exegol they sent a force to destroy him before he could escape the planet. Kaydel, alongside Tico and Kin, participated in the assault on the Sith Eternal's navigation tower on the Resurgent-class Star Destroyer Steadfast. During the assault, Connix injured her leg and was helped back to the Fortitude by Kin. She later celebrated the end of the First Order at the Resistance base alongside Tico and Kin.

VERSES

The Calm Before (13ABY - 29ABY)

Kaydel's life prior to the beginning of the cold war. She lived in Dulathia with her parents, who were ex members of the Alliance to Restore the Republic and raised her with their ideals, along with sharing many stories about General Organa and the other heroes of the Rebellion.

Light The Fire (29ABY - ON)

Worried by the current state of the galaxy and acting against her family's wishes, Kaydel joined the Resistance not long after it was funded by General Leia Organa. She joined the naval branch and was assigned to Fleet Command as a navigations controller, eventually climbing the ranks to Lieutenant.

HISTORY

Born as Mirta Marec on Mandalore as the daughter of two bounty hunters: Ailyn Vel and the Mandalorian Marik Marec, Mirta had an interesting childhood. Her parents divorced not long after she was born, and so she would spend the summers with her father, who taught her all he could about his culture. However, he was killed when Mirta was a young teen, and so she began going on jobs with her mother who, having lost her own mother on a job at a young age, refused to leave Mirta behind. Due to her mother's past, Mirta grew to hate her grandfather, Boba Fett.

As an adult, she embarked on a quest first undertaken by her mother, which was to find and kill her grandfather, the legendary bounty hunter Boba Fett, who had abandoned Ailyn Vel at a young age. During this time, she got married to a man of the last name Gev, and eventually divorced him, but kept the last name because she had already built a reputation as a bounty hunter going by the name of Mirta Gev.

When Mirta finally tracked Fett down, she ended up entering into a partnership with the dying bounty hunter to find a cure for his illness. Mirta assisted Fett in finding a bounty hunter named Skirata, who had medical data needed to treat Fett. Eventually, he was cured, and Mirta continued to work with Fett after the endeavor.

Despite having grown up hating the man for his wrongdoings towards her mother, and after the death of Ailyn, Mirta tried hard to learn to love and bond with Boba, for she didn't want to be alone. They bonded over the recent loss of her mother, and through her curiosity about his ex wife, Sintas, the grandmother that Mirta had never gotten to meet. Her stubborn refusal to let Boba push her away led to them becoming quite close.

VERSES

All I Had (Early life)

Mirta was born on Mandalore. With both her parents being bounty hunters, her life was quite eventful. Her father died when she was still a child and so the rest of her childhood was spent with her mother, traveling through the galaxy while Ailyn continued to work as a gun for hire impersonating her father, Mirta's grandfather, Boba Fett.

A Tough Galaxy (Adulthood)

Mirta's adult life. From her father she learned the ways of Mandalorians, from her mother she learned her hatred for Boba Fett, who had since become the Mand'alor. After the capture and following death of her mother, Mirta set out to find and kill Boba herself to finally fulfill her mother's life mission. However, she found Fett deathly ill and instead of killing him, assisted him in finding a cure for his illness. Her life took a turn afterwards.

HISTORY

Voe was born in 5ABY, in an isolated moon known as Hubin, home of clan Markona. Her mother, Tula Markona, was the leader of the clan, and granddaughter of a deserting Jedi. Force sensitivity skipped two generations, showing up again in the family with Voe. Her mother, who had offered shelter to a group of rebels that included Luke Skywalker and his sister, Leia, during the rebellion, contacted Luke and convinced him to take her daughter as a Padawan. Voe became the third Padawan Luke took, after Grogu and his nephew, Ben Solo. The Markona clan had a culture known for perfectionism and pushing its members to always try to outdo each other, because of this —along with feelings of inadequacy and social awkwardness that made her feel like she didn't belong with the Jedi—, Voe spent her teenage years trying to be better than Ben.

In 28 ABY, the friendly rivalry between Voe and Ben turned into full on animosity when Voe —along with two other Padawans known Hennix and Tai— returned to the Jedi temple to find it burned to the ground, with Ben Solo as the only survivor confessing to having killed Luke Skywalker. Voe, who looked to Skywalker as a father figure, allowed her feelings of anger and grief at the news get the best of her and convinced her fellow Padawans to not get anyone else involved until they'd neutralized the threat that Ben posed, determined to bring him to justice.

After the unintentional death of Hennix at the hands of Ben Solo, Tai and Voe followed Ben to the Knights of Ren's current location, Minemoon, and engaged in combat with the leader, Ren. Later, Ren killed Tai, and enraged by this, Ben killed Ren, unleashing force lightning and scattering the combatants. Ben retrieved Voe and Ren's lightsabers, stabbing Voe through the chest with Ren's after telling her that the Jedi were no more, and so since there was nobody left to train her, she had no reason to live. However, unbeknown to both of them, Tai had contacted Ben's mother, Leia, through the force and got there in time to find a heavily injured Voe who still clung to life. She was taken back to the Organa-Solo home, where they provided her with the medical care she needed. The damage to her lungs and heart was irreparable, and so they were replaced with pulmonodes.

VERSES

Not Long After (15ABY - 28ABY)

When Voe was ten years old, it became clear to her mother, Tula Markona, that a force sensitive child required more than she could provide her with in Hubin. She contacted Luke Skywalker, an old acquaintance and brief flame from back during the years of the rebellion, and he took Voe as his Padawan, training her alongside Ben Solo, Hennix and Tai.

I Am Strong (28ABY - ON)

After being stabbed by Ben, Voe almost died, but her negative feelings regarding the need for justice and revenge for the death of her master and fellow Padawans at the hands of the recently named Kylo Ren kept her alive long enough for Leia Organa to save her, and became a member of The Resistance.
