Privacy Policy for SpySweep – Hidden Camera Scanner

Last updated: [insert date]

SpySweep ("the App") is developed by Aspiro Labs. This Privacy Policy explains how the App handles information when you use it.

1. Information We Collect

SpySweep is designed to work fully on your device. We do not require account creation, login, or any personal registration to use the App.

- Camera: Used only to display a live preview and analyze brightness patterns for the Lens Reflection Scan feature. Camera frames are processed locally on your device and are never recorded, stored, or transmitted anywhere.

- Magnetometer Sensor: Used to measure magnetic field strength for the Magnetic Field Scan feature. This data stays on your device and is not transmitted or stored beyond your current session.

- WiFi / Network Information: Used to scan devices connected to your local WiFi network for the Network Device Scan feature. This scan is performed locally on your device; we do not access, store, or transmit your network data to any server.

- Location Permission: On some Android versions, WiFi scanning requires location permission to be granted at the operating system level. SpySweep does not access, track, collect, or store your actual location, and this permission is used solely to enable the WiFi scanning feature as required by Android.

2. Advertising

SpySweep displays advertisements through the Unity Ads SDK to support free use of the App. Unity Ads may collect certain device and usage information (such as device identifiers, general location based on IP address, and ad interaction data) in order to serve and measure advertisements. This data collection is governed by Unity's own privacy policy, available at: <https://unity.com/legal/privacy-policy>

You may be able to limit ad personalization through your device's ad settings (e.g., Android Settings > Google > Ads > Opt out of Ads Personalization).

3. Data Storage

Any scan results, settings, or history within the App are stored locally on your device only. We do not operate servers that store your personal scan data, and we do not have access to it.

4. Data Sharing

We do not sell, rent, or share your personal information with third parties, except as necessary for the Unity Ads SDK described above to function.

5. Children's Privacy

SpySweep is not directed at children and is not designed for use by children under the age applicable in your jurisdiction. We do not knowingly collect personal information from children.

6. Your Choices

Since the App does not require an account, there is no personal data tied to an identity for us to delete on request. You can uninstall the App at any time to remove all locally stored data from your device.

7. Changes to This Policy

We may update this Privacy Policy from time to time. Changes will be posted at this same location with an updated "Last updated" date.
